Welcome Potential Site Supervisors!

We are always pleased to open new clinical sites for our practicum and internship students in Clinical Mental Health Counseling and Marriage & Family Counseling/Therapy. Specific information about what the Graduate Program requires of our students in the clinical portion of their program is located on the Guidelines page.

Student’s serve in practicum/internship at the end of their academic coursework. The practicum is a one semester experience in which the student acquires a minimum of 100 hours on site (a minimum of 45 of those hours are in direct client contact). The internship is a three semester experience in which the student acquires a minimum of 200 hours on site (a minimum of 85 hours are in client counseling sessions) per semester. The student is required to video some of their counseling sessions for grading purposes.

Site supervisors are required to hold current licensure as a Licensed Professional Counselor, Licensed Marriage and Family Therapist, Licensed Clinical Social Worker, or Psychologist. Site supervisors will contractually agree to provide one hour per week in individual or triadic supervision with the student(s).

Each site must be officially approved by the Clinical Coordinator. The approval process consists of submitting a current resume and licensure of all potential supervisors at the agency/organization and the TNU Site information form. The Clinical Coordinator will contact the site for a personal visit to meet the supervisors and further discuss Trevecca’s program. Once approved, your site and the names of supervisors, information about your site, and supervisors’ resume/vitae will be available for students to view and consider when applying for practicum/internships on our password protected interface for students and faculty. You may get calls from students to inquire about availability and possible interviews. All students have been informed to send their resumes to the site prior to interview or with an application.

The Graduate Counseling Program provides training in supervision for all approved site supervisors which is available through an annual Site Supervisors Lunch and Training event, TNU sponsored local trainings by faculty, and posting videos of training events on this website. We hope you will consider becoming part of the TNU Graduate Counseling Program’s community of approved sites and supervisors. We have found this relationship to be rewarding and a win-win-win for our students, counseling sites, and clients. You will find our students academically prepared, compassionate, and eager to become counselors of excellence.

Johanna Powell, MMFT, LMFT
