

Tribeca Film Press FTP Instructions

You will need to access our FTP server using a FTP client (NOT a web browser). There are several free FTP clients available for both PC and Mac. A good free client to use is FileZilla (available here: <http://filezilla-project.org/download.php>). It is very simple to use and will give you the ability to upload or download.

For PC Users

1. Go to start Menu
2. Open "My Computer"
3. In the address bar type: <ftp.tribecafilmfestival.org>
4. Enter username: tfpress
5. Enter password: TFpre33!

Password is case sensitive – please make sure you enter it exactly as it appears above.

For Mac Users

1. Once you have downloaded a FTP client, double click on it to install and follow the wizard
2. When you open filezilla, the first bar on the top will say "quick connect"
3. Enter <ftp.tribecafilmfestival.org> in the host field
4. Enter username: tfpress
5. Enter password: TFpre33!

Password is case sensitive – please make sure you enter it exactly as it appears above.

6. Leave the Port field blank
7. Click "connect"

Troubleshooting Tips

If trouble persists in downloading clips from our server, change the directory you are attempting to save files in (to My Documents or Desktop, for example).

For any questions, please contact Alanna Whittington at 212-941-2014 or awhittington@tribecafilm.com
