

*What is a miracle?*

*According to Webster, a miracle is "an event or effect in the physical world beyond or out of the ordinary course of things, deviating from the known laws of nature, or transcending our knowledge of these laws." In reality miracles are events that take place as a result of the operation of a higher, unknown law. All true action is governed by law. Nothing just happens. All happenings are the result of cause and can be explained under the law of cause and effect." Charles Fillmore, The Revealing Word, p. 135.*

*"There are no miracles in science. Jesus did no miracles. All His marvelous works were done under laws that we may learn and use as He did." - Charles Fillmore, Jesus Christ Heals.*

*"Let us clearly understand that a miracle is not a violation of the laws of nature, nor was any such claim ever made by those who performed miracles." - Charles Fillmore, Weekly Unity, April 8, 1914.*

*"In the light of modern science the miracles of the Bible can be rationally explained as Mind acting in an omnipresent spiritual field which is open to all men who develop spiritually." - Charles Fillmore, Atom Smashing Power of Mind, p. 38.*

*"There is no limit to the so-called "miracles" that can be performed by those who consecrate themselves wholly to do the will and the work of Christ." - Myrtle Fillmore, Healing Letters, p.166.*

*"Scientific Christians regard as mortal superstition the prevalent view that miracles are the abrogation by God of His laws and are a sort of legerdemain to attract and astonish the people." - Charles Fillmore, Jesus Christ Heals.*
