Training Catalog

Mazda Technical Training Content for Subscribers consists of courseware in the following two formats WBTs and PowerPoint Presentations.

Web-Based Training (WBT) – Typically covered Systems and Components Theory of Operations and some courses may address maintenance, repairs and diagnosis as well. The courses can be viewed on-line but content cannot be downloaded.

Presentations (PRES) – Intended to accompany lectures for both in-person instructor-led training (ILT) and Interactive Distance Learning (IDL), these presentations are available for download.

The table below shows courses available through a subscription. New courses will be available annually.
