# SSA-EB Series Emergency Stop Push Buttons

# Datasheet

Illuminated safety BUS gateway compatible 30 mm mount electro-mechanical push buttons

- Designed to interface with Safety BUS nodes/gateways
- Rugged design; easy installation with no assembly or individual wiring required
- Push-to-stop, twist-to-release, or pull-to-release operation per IEC60947-5-5
- Latching design complies with ISO 13850; direct (positive) opening operation per IEC 60947-5-1
- Compliant with ANSI B11.19, ANSI NFPA79, and IEC/EN 60204-1 Emergency Stop requirements
- "Safe Break Action" ensures N.C. contacts will open if the contact block is separated from the actuator
- 5-pin M12/Euro-style Quick Disconnect
- Models with YELLOW and RED indication of actuation (armed or depressed/latched button)
- "Emergency Stop" legend included
- U.S. Patent No. Des. 700,149

Models SSA-EB... series are "mushroom-style" electro-mechanical emergency stop push buttons. When the button is armed, the switch's safety contacts (N.C.) are closed and its monitoring contacts (N.O.), if present, are open. When the button is pushed, the switch's safety contacts open and the monitoring contacts close. The contacts remain in this condition until the push button is manually rearmed by twisting clockwise the red push button actuator.

The SSA-EB1P..-02ECQ5.. series has a 30 mm mounting base similar to Banner's OTB, VTB, and STB Optical Touch Buttons for ease of mounting without requiring an additional enclosure. The illuminated models provide indication of an armed button and a pushed/actuated button (indication is dependent on model). The red indication allows for easy identification of a pushed/actuated button.

### Models

Model	EZ-LIGHT <sup>®</sup> Illumination Logic and Description	Connection	
SSA-EB1PL-02ECQ5A	OFF (armed), RED (solid, PUSH)	5-pin M12 QD Safety BUS node compatible <sup>1</sup>	
SSA-EB1PLXR-02ECQ5A	PLXR-02ECQ5A OFF (armed), RED (flash, PUSH)		
SSA-EB1PLYR-02ECQ5A	YELLOW (armed) & RED (flash, PUSH)	CH1 = pins 1 & 2	
SSA-EB1PL2-02ECQ5A	Illuminated button, OFF (armed), RED (solid, PUSH ON)	CH2 = pins 4 & 5	
SSA-EB1PL-02ECQ5B	OFF (armed), RED (solid, PUSH)	5-pin M12 QD Safety BUS node compatible <sup>2</sup>	
SSA-EB1PLXR-02ECQ5B	1PLXR-02ECQ5B OFF (armed), RED (flash, PUSH)		
SSA-EB1PLYR-02ECQ5B YELLOW (armed) & RED (flash, PUSH)		CH1 = pins 1 & 4	
SSA-EB1PL2-02ECQ5B	SA-EB1PL2-02ECQ5B Illuminated button, OFF (armed), RED (solid, PUSH ON)		

Additional models available. For non-illuminated models, see http://www.bannerenginnering.com and search 162755.

# Important... Read this before proceeding!

The user is responsible for satisfying all local, state, and national laws, rules, codes, and regulations relating to the use of this product and its application. Banner Engineering Corp. has made every effort to provide complete application, installation, operation, and maintenance instructions. Please contact a Banner Applications Engineer with any questions regarding this product.

The user is responsible for making sure that all machine operators, maintenance personnel, electricians, and supervisors are thoroughly familiar with and understand all instructions regarding the installation, maintenance, and use of this product, and with the machinery it controls. The user and any personnel involved with the installation and use of this

Compatible with AllenBradley ArmorBlock® 1732DS Safe DeviceNet remote I/O
 Compatible with Siemens ET 200pro PROFIsafe gateway

product must be thoroughly familiar with all applicable standards, some of which are listed within the specifications. Banner Engineering Corp. makes no claim regarding a specific recommendation of any organization, the accuracy or effectiveness of any information provided, or the appropriateness of the provided information for a specific application.

WARNING: Not a Safeguarding Device

An Emergency Stop Device is not considered a safeguarding device because it requires an overt action by an individual to stop machine motion or hazards.

A safeguarding device limits or eliminates an individual's exposure to a hazard *without action by the individual or others.* Because an individual must actuate the device for it to function, these devices do not fit the definition of a safeguarding device and cannot be substituted for required safeguarding. Refer to the relevant standards to determine those requirements.

### **Emergency Stop Considerations**

ANSI NFPA 79, ANSI B11.19, IEC/EN 60204-1, and ISO 13850 specify emergency stop requirements, including the following:

- Emergency-stop push buttons shall be located at each operator control station and at other operating stations where emergency shutdown is required.
- Stop and emergency-stop push buttons shall be continuously operable and readily accessible from all control and operating stations where located. Do not mute or bypass E-stop buttons.
- Actuators of emergency-stop devices shall be colored red. The background immediately around the device actuator shall be colored yellow (where possible). The actuator of a push-button-operated device shall be of the palm or mushroom-head type.
- · The emergency-stop actuator shall be a self-latching type.

WARNING: Emergency Stop Functions

Do not mute or bypass any Emergency Stop device. ANSI B11.19, ANSI NFPA79 and IEC/EN 60204-1 require that the Emergency Stop function remain active at all times.

WARNING: Multiple Switching Devices

Whenever two or more devices are connected to the same safety module (controller):

- Contacts of the corresponding pole of each switch must be connected together in series. *Never connect the contacts of multiple switches in parallel.* Such a parallel connection defeats the switch contact monitoring ability of the Module and creates an unsafe condition which may result in serious injury or death.
- Each device must be individually actuated (engaged), then released (or re-armed) and the safety module reset. This allows the module to check each switch and its wiring to detect faults.

This check must be performed during the prescribed checkouts. Failure to test each device individually in this manner may result in undetected faults and create an unsafe condition which may result in serious injury or death.

#### Installation and Maintenance

The device must not be affected by environmental conditions. Install the device so that operation is not impeded, but should be protected against inadvertent operation (for example, accidental actuation by being bumped or leaned against). Do not operate the switch using a tool. Do not expose the switch to excessive shocks and vibrations, otherwise the switch may be deformed or damaged, causing malfunction or operation failure. Hardware includes jam nut, lock washer, lock ring, and seal washer. The lock ring may be used to prevent switch rotation if a 5mm hole keyway is provided.

Electrical installation must be made by qualified personnel<sup>3</sup> and must comply with NEC (National Electrical Code), ANSI/ NFPA 79 or IEC/EN 60204-1, and all applicable local standards. It is not possible to give exact wiring instructions for a device that interfaces to a multitude of machine control configurations. The following is general in nature; it is recommended to perform a risk assessment to ensure appropriate application, interfacing/hookup, and risk reduction (see ISO 12100 or ANSI B11.0).

A Qualified Person possesses a recognized degree or certificate or has extensive knowledge, training, and experience to solve problems relating to the emergency stop installation.

Pin	Color	-02ED1Q5A		-02ED1Q5B		Pinout
	COIOI	Function	Contacts	Function	Contacts	Fillout
16	Brown	CH1a	N.C.	CH1b	N.C.	
2	White	CH1b	N.C.	CH2a	N.C.	
3	Blue	0V dc		0V dc		
4	Black	CH2a	N.C.	CH1a	N.C.	
5	Gray	CH2b	N.C.	CH2b	N.C.	3

#### WARNING: Shock Hazard and Hazardous Energy

Always disconnect power from the safety system (for example, device, module, interfacing, etc.) and the machine being controlled before making any connections or replacing any component.

Electrical installation and wiring must be made by Qualified Personnel and must comply with the relevant electrical standards and wiring codes, such as the NEC (National Electrical Code), ANSI NFPA79, or IEC 60204-1, and all applicable local standards and codes.

Lockout/tagout procedures may be required. Refer to OSHA 29CFR1910.147, ANSI Z244-1, ISO 14118, or the appropriate standard for controlling hazardous energy.

### Checkout

At machine set up, a Designated Person<sup>7</sup> should test each emergency stop push button for proper machine shutdown response. A Designated Person should check the emergency stop buttons for proper operation, physical damage, button looseness, and excessive environmental contamination. This should take place on a periodic schedule determined by the user, based on the severity of the operating environment and the frequency of switch actuations. Adjust, repair, or replace components as needed. If inspection reveals contamination on the switch, thoroughly clean the switch and eliminate the cause of the contamination. Replace the switch and/or appropriate components when any parts or assemblies are damaged, broken, deformed, or badly worn; or if the electrical/mechanical specifications (for the environment and operating conditions) have been exceeded. Always test the control system for proper functioning under machine control conditions after performing maintenance, replacing the emergency stop device, or replacing any component of the device.

Compatible with AllenBradley ArmorBlock<sup>®</sup> 1732DS Safe DeviceNet remote I/O. Compatible with Siemens ET 200pro PROFIsafe gateway.

Fin 1 on all models requires power from the node/gateway for the EZ-LIGHT<sup>™</sup> illumination logic (see LED Voltage/Current specifications). User must verify 6 A Designated Person is identified in writing by the employer as being appropriately trained to perform a specified checkout procedure. A Qualified Person

possesses a recognized degree or certificate or has extensive knowledge, training, and experience to solve problems relating to the emergency stop installation.

# Specifications

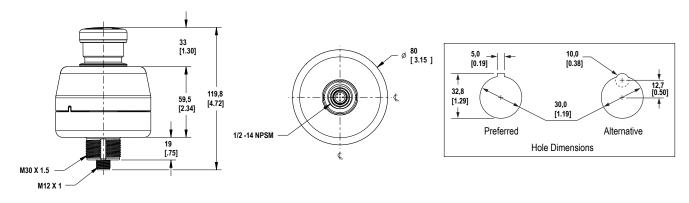

Housing / Button Polycarbonate / Polyamide Threaded base has M30 x 1.5 external threads; Max. Tightening Torque: 4.5 N·m (40 in·lbf) Operating Conditions Temperature: $-25$ °C to $+55$ °C ( $-13$ °F to $+131$ °F) Humidity: 45% to 85% RH (no condensation) Environmental Rating IP65 (IEC60529) Insulation Resistance 100M $\Omega$ minimum (500 V dc megger) Impulse Withstand Voltage 2.5 kV Pollution Degree 3	<ul> <li>Vibration Resistance Operating extremes: 10 to 500Hz, amplitude 0.35 mm acceleration 50 m/s<sup>2</sup></li> <li>Illuminated Base LED Color: Yellow - 590 nm, Red - 618 nm LED Flash Rate: 1.6 Hz at 50% duty cycle LED Voltage/Current: 12 to 30 V dc; 120 mA at 12 V dc, 65 mA at 24 V dc, 60 mA at 30 V dc</li> <li>Illuminated Button LED Color: Red LED Voltage/Current: 24 V ac/dc ±10%; 15 mA</li> <li>Electrical Rating Minimum load: 1 mA at 5 V ac/dc SSA-EB1PLxxQ5: 3 A at 250 V maximum UL Applications: 1.5 A at 250 V ac, 1 A at 30 V dc (pilot duty)</li> </ul>
o Output Configuration See Installation and Maintenance on page 2	CE Applications: AC-15: 1.5 A at 250 V ac, DC-13: 1 A at 30 V dc Rated Insulation Voltage (Ui) 250 V
Overvoltage Category	Rated Current (Ith) 3A
Contact Material/Bounce <sup>®</sup> Gold plated silver / 20 ms	B10d 100,000 (based on ISO13849-1(2006))
Electrical Life 100,000 operations minimum, 250,000 operations minimum at 24 V AC/DC, 100 mA	Design and Application Standards Compliant with EN/IEC 60497-1 / -5-1, ISO 13850, ANSI B11.19 , ANSI NFPA79, IEC 60204-1
Mechanical Life 250,000 operations	Date code format (U.S. Standard Format) YYWWX: 2-digit year, 2-digit week, "X" internal code
Shock Resistance Operating extremes: 150 m/s <sup>2</sup> (15G)	Certifications
Rated Operating Current and Voltage (Ue)	

Rated Operating Current and Voltage (Ue)

Safety Contact (N.C.)		30 V	125 V	250 V
AC 50/60 Hz	Resistive Load (AC-12)	-	-	3 A
	Inductive Load (AC-15)	-	3 A	1.5 A
DC	Resistive Load (DC-12)	2 A	0.4 A	0.2 A
	Inductive Load (DC-13)	1 A	0.22 A	0.1 A

The operating current is classified according to JIS C 8201-5-1-1999 making and breaking capacities and are measured at resistive/inductive load types specified in IEC 60947-5-1. See "Electrical Rating" above for specific model and UL/CE maximum ratings.

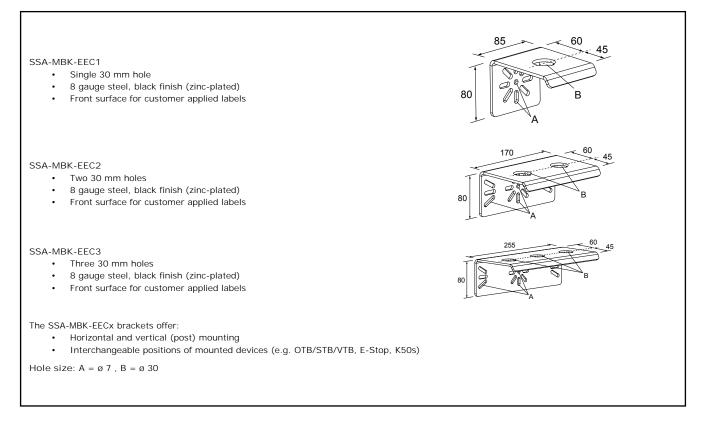

### Dimensions

When the button is reset, the normally closed contacts will chatter. When pressing the button, the normally open contacts will chatter. When designing a control circuit, take the contact chatter time into consideration. Do not expose the switch to external shocks, otherwise the contacts will bounce. 8

## Accessories

#### Mounting Brackets

#### Cordsets

# EC Declaration of Conformity (DoC)

Banner Engineering Corp. herewith declares that the SSA-EB1.. Emergency Stop Push Buttons are in conformity with the provisions of the Machinery Directive (Directive 2006/42/EC) and all essential health and safety requirements have been met.

Representative in EU: Peter Mertens, Managing Director Banner Engineering Europe. Address: Park Lane, Culliganlaan 2F, 1831 Diegem, Belgium.

### Banner Engineering Corp Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXTRA COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp.
