

PERFORMANCE EVOLUTION: Dual Company #8

Supporting the Progressive Hoselay

Tactical Objective: Rapidly deploy an attack line and support it with water, equipment and personnel

Given: 2-3 Engines, hose, nozzles, T's, Clamps, radios and full PPE

Performance: Primary company to deploy attack line per standard and be supported by one or more companies so as to extend hoselay to 1,200' or more while maintaining a continuous flow of water. The 2nd company will arrive on scene when the first crew advances 400'. After the 1,200' mark crews will demonstrate how to remove a burst section.

Standard: In a safe and efficient manner crews will deploy the first 600' within 12 minutes and the next 600' within 30 min, or 5min per 100'.

Critical Assessment		
Full PPE	Wheels Chocked	Reds / Headlamps
Blown Hose (clamp)	Radio Harness 800-VHF	Team work
Pump pressure	Nozzle Technique	Leaks /wasted water
>1min Reflex Time	Major Kinks	Line Pulled too tight
