

PERFORMANCE EVOLUTION: #E-11

Type I / III Progressive Hoselay Initial Attack

- Tactical Objective:** To Rapidly engage a simulated vegetation fire with a 1.5” progressive hoselay of at least 600’
- Given:** Grassy slope (20-33%), Type I or III Engine, 1.5” hose packs, Hose clamps, PPE, Radios, 3-4 personnel, T’s, and nozzles.
- Performance:** Personnel will rapidly and with proper and safe technique advance a 1.5” attack line on a simulated fire
- Standard:** In a safe and efficient manner crew will initiate fire attack (water flowing) on a simulated fire in less than 60 seconds from the time the brakes are set. The crew will complete the 600’ lay within 12 minutes. Crews may only advance the line when it is flowing water with a minimum of 40 gpm.

Critical Assessment (30 second penalty for each item missing)		
Full PPE	Wheels Chocked	Reds / Headlamps
Blown Hose (clamp)	Radio Harness 800-VHF	Team work
Pump pressure	Nozzle Technique	Leaks /wasted water
>1min Reflex Time	Major Kinks	Line Pulled too tight
