

## PERFORMANCE EVOLUTION: Dual Company #5

### Engine Supporting Truck for Elevated Master Stream

**Tactical Objective:** Engine and Truck Company to establish a water supply and provide an elevated fire stream.

**Given:** An engine company, truck company, hydrant and an area large enough to flow elevated fire streams.

**Performance:** Truck and Engine company personnel will deploy an elevated master stream flowing a minimum of 800 gpm.

**Standard:** All evolutions to be performed in a safe and efficient manner. Emphasis is on company-to-company teamwork.

#### Critical Assessment

Tires Chocked		
Proper EP	Portable Radios Used	Relief Valve Set
Aerial supply hose laid out correctly	Slowly charge lines	Slowly shutdown lines
Effective Fire stream	Aerial halyards attached correctly	Efficient use of personnel
