Wow bfa engineering leveling guide

Engineering is a pretty useful skill, for any class, with a whole lot of interesting items, gadgets, etc. If you are a Gnome then you get +15 for your Engineering skills as a race bonus. Are you considering Engineering as your profession? Profession Perk: The Synapse Springs gadget can be attached to your gloves and increases your primary state by 480 for 10 seconds, once per minute. This makes it a pretty useful burst on demand item. Other perks, besides the special jewelry and fun elements, are: engineering goggles that make for a very nice rudder (example: Enhanced Bio-Optic Killshades,) Cogwheel rudder beads are better than Jewelcrafters' own pearls (but offer no primary statistics,) and fun gadgets to use as enchants for their gloves and belt. Specializations at skill level of 200, you can go and learn one of the two specializations available for Engineering: Gnomish Engineering – If you want to become a gnomish engineer, you will need to complete a short quest chain. This specialization focuses on gadgets. Goblin Engineering - Also requires a short quest chain. This specialization focuses on explosive. You're not locked in one way or the other. Talk to the book Evil Soothsaying for Dummies in Tanaris to switch from one to the other. (Soothsaying for Dummies now sits on a table at Bootlegger Outpost. The coordinates are 55.60 next to npc Narain Soothfancy. You have to click on it a second time to learn Goblin or Gnomish Engineering when you have paid 150 gold to teach the one you do not want.) You'll also need to renew your membership every two weeks with the faction you signed up with. It's quite cheap, but you'll have to remember to take care of it if you go on holiday from WoW for a few weeks. Gold???? Bwahahaha! Engineering was designed to consume gold, lots of gold, not do it. That having hog will cost you about 12-15k just to do. There are various items used by other players and you can sell a pig every week or two, but many Engie items come with Engie skill requirements, so will not sell well. Not to say that you can't make gold with this skill, it's just hard fashion. Other professions are better choices for actually earning, and if you want tips on getting more gold (to pay for crafting, gear, donations to the exploded pixie repair fund, or whatever,) grab a copy of WoWcrusher. Nebulaes of Pandaria Zen Master Engineering, skill cap of 600, level up to 500, my level is 80. This page will be updated once the new engie recipes are introduced.
