

Travel Solutions

Every type of trip, for any kind of business. Easily provide your employees, customers, and guests with efficient and expenseless travel solutions. With custom permissions, you can choose exactly how you want your account to be used.

Business Travel

Give your employees the gift of expenseless on-demand rides, and save them valuable time and frustration before, during, and after each trip. You can set spend caps or require expense codes to ensure that rides taken on your account are always in policy.

Commuting

Help your employees use their commute time productively, while reducing traffic and congestion. Set pickup and dropoff locations, time of day, vehicle class, or spend caps to build a commute solution that works for your business and encourages efficient commuting.

Recruiting

Give candidates rides to interviews on your company's Uber account. Make a great first impression with a seamless process, and don't worry about reimbursing them. Permissions ensure that rides originate or end at your office, and you can set a spend cap.

Customer Travel

Ensure that customers and clients can always get where you need them to be, at no cost to them. Give your employees the ability to request and manage multiple rides for others when you enable Central for your Uber for Business account.

Events

Give your guests door to door transportation so they don't have to worry about driving or parking. Control the end to end event experience for corporate parties, concerts, special events, and more. Either call them rides with Central or invite them to ride on your account.

Perks

Take care of your employees' late night rides home or give them a monthly ride stipend to show them you appreciate their hard work. With location, time, and spend permissions you can customize your employee perks with ease.
