

Nursing Unit Descriptions – UCHealth Memorial Hospital Central

ACUTE CARE SERVICES

Neuroscience 5C

Neuroscience is a 24-bed unit with all private rooms for our patients. The department specializes in acute stroke, TIA, seizure, epilepsy, and all Neurological related issues. They also care for neurosurgical patients, including post-operative management, deep brain stimulators, and other neurological procedures. The typical nurse-to-patient ratio is 1:5 (days) and 1:5-6 (nights), with a dedicated Charge Nurse, Patient Care Tech support, and a daytime Unit Secretary. The staff work 12-hour shifts with holiday and weekend requirements and are offered self-scheduling.

Medical Unit 5 North

This is a 26-bed unit specialized to care for patients with medical disorders, hypertension, acute renal disease or ESRD as well as diabetes and heart disease. There is also a 5-bed inpatient dialysis unit on this floor staffed by contract employees. The typical nurse-to-patient ratio is 1:4 (days) and 1:5-6 (nights). Nursing Assistants are staffed each shift as part of the unit's care team model. All nurses are certified in continuous abdominal peritoneal dialysis (CAPD) after hire. The staff work 12-hour shifts, have set holidays that rotate yearly, and are offered self-scheduling.

Surgical Trauma 65

Surgical Trauma is a 24-bed unit caring for both general surgical and trauma patients. Patients include abdominal, urological, thyroid, and ENT surgeries. The trauma population includes multi-trauma injured patients, ranging from TBI to orthopedic injuries. Memorial Hospital Central is a Level II Trauma hospital. The typical nurse-to-patient ratio is 1:4-5 (days) and 1:5-6 (nights). Patient Care Technicians assist the RNs with the care of the patients.

Ortho-Spine 6N

Ortho-Spine is a 29-bed unit, with a 11-bed extension unit. It has a very diverse population of surgical patients, which includes primary and revision joint replacement procedures, spine surgeries, orthopedic trauma patients, and a small population of bariatric surgeries. All beds have monitoring capabilities for post-operative sleep apnea. This is a busy turnover unit as the average patient length of stay is 2.8 days. Typical RN to patient ratio is 1:4-5 (days) and 1:5-6 (nights).

Medical Surgical 6C & 1W

Medical Surgical is a 25- and 12-bed unit with a very diverse population of medical-surgical patients. Services provided include (but are not limited to): COPD (primary diagnosis), asthma, pneumonia, DVT prevention and treatment, hypoxia, diabetes, HTN, infectious disease, surgical urology patients, adult general surgery patients, wound care, point of care testing, comprehensive skin care, and telemetry monitoring. The majority of patients experience a multiplicity of issues requiring multiple levels of care ranging from general to intermediate level. Typical RN to patient ratio is 1:4-5. Patient Care Techs are assigned to the nurses and are delegated to according to the nurse practice act.

This unit is a dynamic and fast-paced environment rich with opportunity for learning. We utilize a multidisciplinary approach to patient care that encourages team work between physicians, nursing staff, therapy staff, social work and a variety of other consulting disciplines to provide the most comprehensive care for our patients.

The heartbeat of our Adult Medical Surgical unit is teamwork for the sake of holistic patient-centered care and a healthy work environment that allows our staff to thrive and grow both personally and professionally.

Medical Surgical North

MSN is a 48-bed unit split into four pods with all private rooms located on the Memorial North campus. There is a diverse population of medical/surgical patients, which includes orthopedic patients, gynecological surgery patients, cardiac patients, trauma patients, and general medical patients. Typical RN to patient ratio is typically 1:5 on days and 1:6 on nights. Patient Care Techs are assigned to the nurses and are delegated to according to the nurse practice act. The staff work 12-hour shifts, have set holidays that rotate yearly, and are offered self-scheduling.

Staffing Services

This is the float pool for Memorial – UCHealth. This department provides nursing care services for multiple adult inpatient units. Nurse residents are trained to float between all adult inpatient medical/surgical units within the southern region of UCHealth. The float pool staff assists units in filling open shifts for same-day and pre-booked positions. Nurse residents work closely with a float pool preceptor and supervisor to ensure success in the nurse residency program, giving the nurse resident a strong and well-rounded beginning to their nursing career.

ONCOLOGY SERVICE LINE

Inpatient Oncology Unit

This 19-bed unit specializes in the care of hematology-oncology patients with a multidisciplinary approach. The patient population on the unit includes patients receiving active chemotherapy treatment, radiation oncology patients that need I-131, and medical overflow patients. Nursing staff are chemotherapy and biotherapy certified providing the highest nursing care to the oncology patient. The typical nurse to patient ratio is 1:4-5 on days and 1:4-5 on nights.

REHAB SERVICE LINE

Rehab Patient Care Unit

The Rehab Patient Care Unit, or "RPCU," is an acute-care rehab unit at Memorial Hospital. This 22-bed unit specializes in the rehabilitation of patients. The nurses and therapists work together to strive for the patient's independence. The population includes post-stroke, head injury, motor vehicle accidents, joint replacement and/or orthopedic patients. The typical nurse to patient ratio is 1:6 on days and 1:8 on nights. Patient Care Techs are assigned equally and work with the team; the assignment is according to the nurse practice act.

EMERGENCY SERVICE LINE

The ED at Memorial is made up of 86 beds located on two campuses. Staff generally works at one location or the other. Nurses are hired into a variety of assigned positions which may include days, mid-shifts or nights in 8, 10 or 12-hour shifts. Staff is offered self-scheduling.

Memorial Central is the busiest ED in the state of Colorado. It is a Level I Trauma Center that has 68 beds to include three trauma/resuscitation rooms, a critical care area, a pediatric area, as well as a locked behavioral health unit. ACLS, TNCC, ENPC and/or PALS are required within 6 months of hire and are offered during the residency program.

The Memorial North campus has 18 beds. It is a Level III Trauma Center, has a cath lab, and typically sees medical, surgical, and orthopedic emergencies. ACLS, TNCC, ENPC and/or PALS are required after hire and floor orientation.

CRITICAL CARE SERVICES

ICU

We have 46 critical care beds located on 2 campuses (Memorial Central and Memorial North). The staff rotates between the two locations.

The Central campus is a 36-bed unit specializing in acutely ill adults with medical, surgical, neurological/neurosurgical, and cardiac conditions. Other patients include those who have undergone interventional radiology, vascular and cardiothoracic surgeries, or who have sustained traumatic injuries. This campus is a Level I trauma center, and both primary stroke and chest pain accredited.

The North campus ICU is a 10-bed unit specializing in acutely ill adults with medical, surgical conditions. It is a Level III trauma center.

Nurses on both campuses provide care for patients requiring close monitoring with intensive therapeutic modalities-mechanical ventilation, continuous renal replacement, intra-aortic balloon pumps, vasoactive medications, and advanced hemodynamic monitoring. Nursing assignments are made on a shift to shift basis taking into consideration patient acuity and staff.

Cardiovascular & Thoracic Unit

CVT PCU is an 18-bed unit with 1 semi-private and 16 private rooms, open 24 hours, every day of the year. The unit has the capability of monitoring 6 progressive care beds. Expert nurses are responsible for the assessment, planning, implementation and evaluation of patient outcomes admitted to this unit. Staff provide for multiple levels of care ranging from general to intermediate level. 2S Cardiology is a 10-bed unit, all private rooms, open 24 hours, every day of the year.

CardioVascular & Thoracic PCU specializes in the intermediate care of the adult cardiac/vascular/thoracic patient population. The patient requires monitoring and care of moderate or potentially severe physiologic instability or is stable, with a high potential for becoming unstable, and requires increased intensity of care and vigilance. This includes, but is not limited to, the following patient populations: Congestive Heart Failure, Cardiomyopathy, post angiography (angioplasty, stent), Invasive Radiology, arrhythmias, R/O myocardial infarction (MI), stable acute MI, Unstable Angina, cardioversion, Ablation, s/p pacemaker insertion, 24-hours post open hearts (valve, CABG), vascular intervention, carotids, thoracotomies, transvenous cardiac pacing and post cardiac arrest. Medical/Surgical patients may be admitted to the CVT PCU if additional beds are needed.

WOMEN'S SERVICES

Birth Center

The Birth Center is a 29-bed unit including an 8-bed Obstetrical Emergency Department, 15 labor and delivery rooms, 2 ORs, and 4 recovery rooms. We are a referring hospital for southern Colorado, doing 2,500 deliveries per year. Pregnancy is our specialty. We care for a variety of low and high-risk patients who come to deliver their baby or to have specialized monitoring for high-risk issues such as pregnancy with multiple babies, cardiac problems (maternal or fetal), diabetes, or other chronic health issues. We offer labor rooms with either a walk-in shower or built-in soaking tub to aid in water labor. We are supported by a 58-bed level 3B NICU as well as a normal newborn nursery with couplet care. Our medical providers include private practice OB-GYNs and Certified Nurse Midwives, a community health center practice which combines Certified Nurse Midwives and OB-GYNs, and maternal-fetal medicine perinatology. The nursing team is expert in all areas of OB care from 20 weeks and beyond, committed to remaining patient focused and evidence based. Our specialty high-risk OB transport team brings patients from Southern Colorado, New Mexico, and rural Kansas when a higher level of care is needed for mom or fetus.

Mother/Baby Unit

The mother/baby unit is a 31-bed unit with a 5-bed extended care nursery. Nurses provide couplet care to mothers and babies post-delivery while providing education on post-partum care, breastfeeding, and infant and maternal health. The typical nurse to patient ratio is 1 nurse to 3 couplets (mother and baby). Lactation nurses are available daily for additional breastfeeding needs.

Women's Pavilion

This is an 8-bed unit comprised of all private rooms. The patient population is stable high-risk antenatal care, patients with gynecological issues, and post-op GYN patients. Also included is care for intrauterine fetal demises under 20 weeks. We provide individualized care for our pregnant patients who live on our unit for up to 3 months, waiting for delivery. Our GYN and post-op GYN patients receive the highest level of professional care as we help them to recover after treatment or surgery. Staff are experts in women's health and wellness, caring for a wide variety of issues, including diabetes, hypertension, cardiac issues, and other chronic health concerns. Our long-term patients are pleased with the professional care and personal touches from the staff, often commenting they are better educated and prepared to care for themselves and their babies than when they were admitted. Our medical providers include a large

perinatology practice for high-risk pregnancies, private practice OB-GYNs, and community health OB-Gyns who engage in collaborative, evidence-based practice for best patient outcomes.
