

The Honorable Lamar Smith
Chair, House Committee on Science, Space, and Technology
United States House of Representatives
2318 Rayburn House Office Building
Washington, D.C. 20515

March 14, 2016

Dear Chairman Smith:

As scientists who value the independence of scientific inquiry, we strongly urge you to reconsider your decision to subpoena the internal communications of National Oceanic and Atmospheric Administration (NOAA) scientists. Compliance with your demand would undermine the effectiveness of not only government scientists but also the many thousands of researchers who collaborate with their peers in government to produce policy-relevant information and analysis.

We understand that NOAA has made publicly available all of its data and methodologies related to the peer-reviewed study you criticize. This is more than sufficient to evaluate its robustness. Documents obtained through a subpoena for scientists' internal communications will not contribute to public understanding of climate change science.

We are concerned that this effort will have a chilling effect on federal science research. In a climate of fear, scientists will be less willing to enter government service, while academic and industry experts will be more hesitant to work with their peers in government to address pressing public health and environmental challenges.

Science thrives on rigorous debate and a frank exchange of differing ideas and perspectives. The freedom of scientists to openly disagree and discuss critical scientific topics has brought the United States unparalleled prosperity and global leadership in science. This legacy is put at risk when elected representatives harass scientists. If scientists are to be successful in serving the public good, they must have the freedom to explore ideas without fearing that any individual statement or email will be used to cast doubt on their integrity.

In the interests of the scientific community and the people of the United States, we urge you to stop this burdensome and entirely unwarranted investigation.

Sincerely,
The undersigned (1595 signatories)

CC: Ranking Member Eddie Bernice Johnson
