

Lose Fat For Good!

Recent studies showed a hormone called “leptin” tells the brain how much fat we have stored, so the body knows how much to burn as fuel. Inflammation can disable the brain’s ability to sense leptin, however, sending the body into sugar-burning mode while conserving fat (even excess fat), and sending our cravings through the roof.

While fad diets and weight loss supplements can actually contribute to metabolic dysfunction, the Evolv LifeBar was developed to target leptin insensitivity in a way you can enjoy and sustain. Available in Dark Chocolate, Sweet and Salty Caramel, and Blueberry Pomegranate, and other Limited Edition flavors throughout the year.

By combining an ideal mix of healthy fats, proteins, pre-biotic fiber, advanced immune support, and whole food vitamins and minerals, the Evolv LifeBar helps the body shift to an efficient fat-burning state, and reducing or eliminating sugar crashes and cravings in the process.

REAL PEOPLE, REAL RESULTS

“My sugar cravings are much less, and I lost several pounds and inches, mostly in my waist. I’m feeling healthier overall!”

Naomi Gilligan
Competitive Athlete
