EvolvHealth Chosen as Integrative Health Partner For Dream for the Cure Cancer Research Foundation

June 14, 2019

The “Dream for The Cure” foundation, a San Francisco-based not-for-profit organization created to support the advancement of immunotherapy research for more effective brain cancer treatments, announced that it has chosen EvolvHealth as its integrative health support partner.

According to foundation founder Dr. Renee Hirte, Ph.D, “Our search for the most scientifically advanced technologies for optimal immune and endocannabinoid system support led us to Evolv Health. Their unique immune modulating Aloe Vera Acemannan technology represents the best science I’ve found for Immune system support, and when combined with highly bioavailable broad-spectrum hemp oil, it provides an unprecedented integrative health strategy. Our plan is to not only to incorporate these products into our research, but to also encourage our supporters to consume them as a key part of their own wellness initiatives.”

Immunotherapy is one of the most promising approaches for fighting brain cancer. Immunotherapy provides targeted antibodies that help the body’s immune system more effectively identify and destroy cancer cells while leaving surrounding tissues unharmed. A limiting factor to the overall effectiveness of this ground-breaking technology is the compromised condition of the patients’ immune system.

“We are honored to be part of this important integrative research,” stated CEO of EvolvHealth Sam Caster. Integrative health combines the best new medical therapies with the most scientifically advanced nutritional technologies, in order to support best patient outcomes.

Evolv Health will also be encouraging its data base of Consumers, Affiliates, and Social Business Partners to help support the “Dream for The Cure” foundations research programs.

The EvolvHealth Change Your Life, Change the World™ Mission is to eradicate the impact of childhood malnutrition by enabling millions to Reboot their health using their proprietary line of advanced nutritional products. This mission is powered by their revolutionary Social Business 3.0 model that sustainably funds their Buy 1, Nourish 2™ giving initiative, while richly rewarding those who choose to champion their cause.
