PLOT

Forgetting short term trend is part of the candlestick criteria.

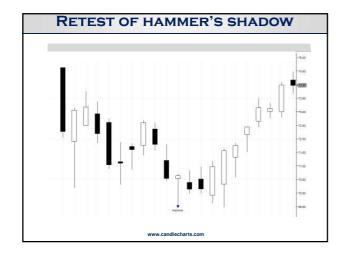

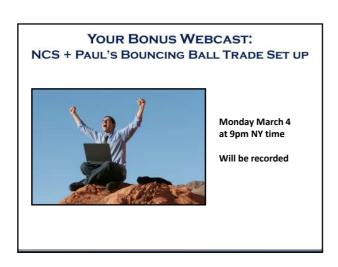

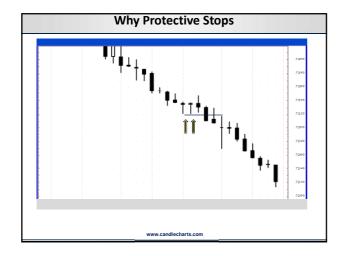

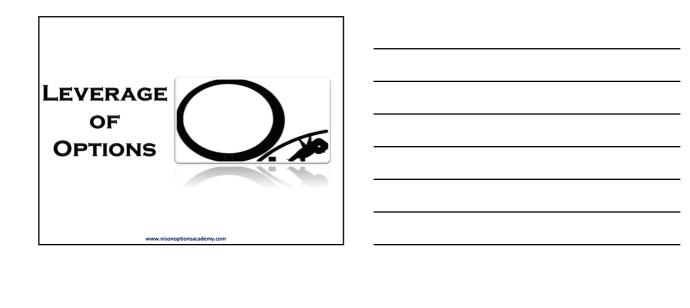

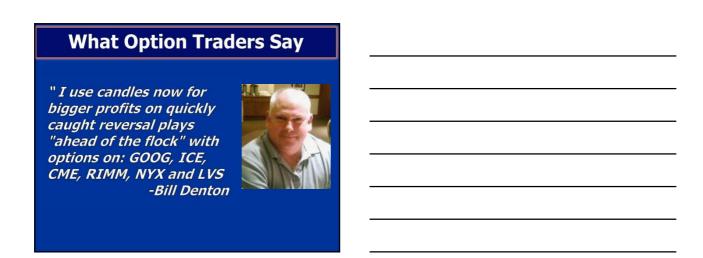

TIMING
ADVANTAGES
OF NISON
CANDLESTICK
STRATEGIES

Direction blows away implied volatility

Direction is the single most important thing you need to know to make money on any options trade

www.nisonoptionsacademy.com

IMPLIED VOLATILITY VS. DIRECTION

AAPL

1) <u>Hold IV constant</u> at 26% and <u>price +20%</u> over 30 days APPL @ 300: 60-day 300 call = \$12.70 APPL @ 360: 30-day 300 call = \$60.10

2) Hold Price Constant at \$300 and IV +20% over 30 days 300 strike 60-day call: Vol @26% = 12.70 300 strike 30-day call: Vol 31.2% = 10.70

Result:

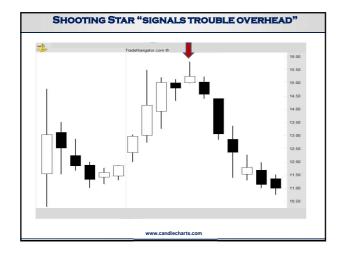

20% change in price = +\$47.40 (374% gain) 20% change in Vol = -\$2.00 (15% loss)

| THE SHOOTING STAR | | |
|---|--|--|
| Basic Criteria: • Market in up trend • Small real body (black or white) at, or near, bottom of session • Upper shadow at least twice height of the real body Market Implication: Potential top reversal Resistance: High of signal as resistance | | |
| www.canagendris.com | | |

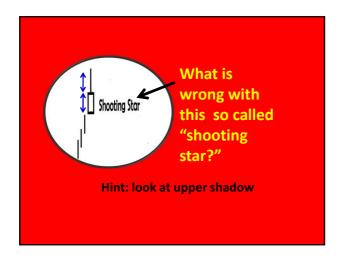

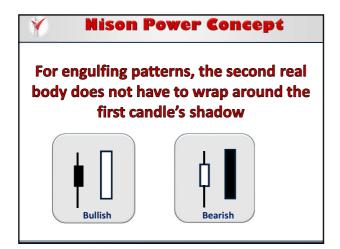

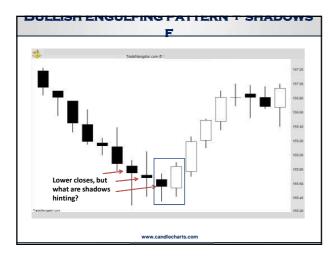

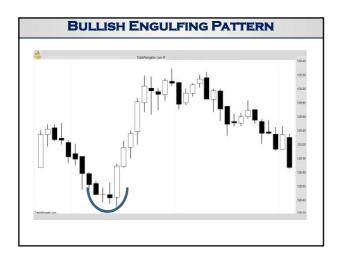

| BULLISH ENGULFING PATTERN | | |
|---------------------------|---|--|
| | Basic Criteria • Market in down trend • White real body wraps around prior session black real body Market Implication Bottom reversal Support The lowest low of the two sessions of the pattern | |

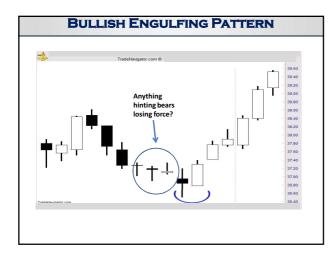

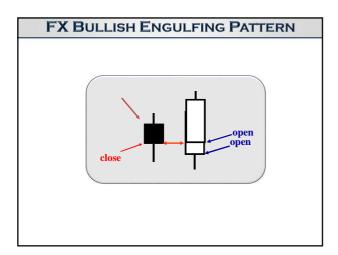

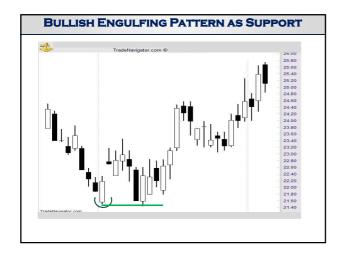

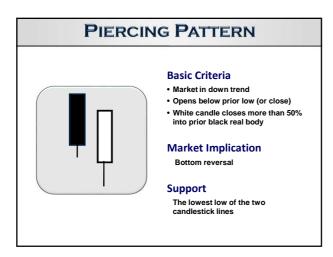

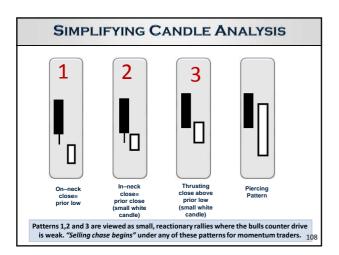

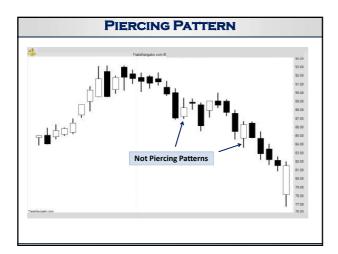

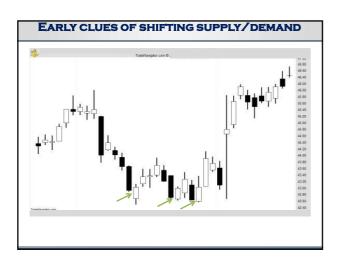

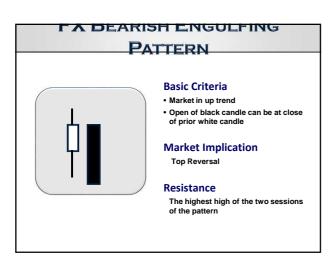

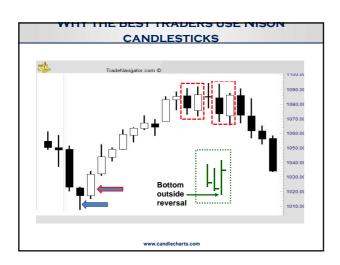

BEARISH ENGULFING PATTERN Basic Criteria • Market in up trend • Black real body wraps around prior session opposite color real body Market Implication Top Reversal Resistance The highest high of the two sessions of the pattern

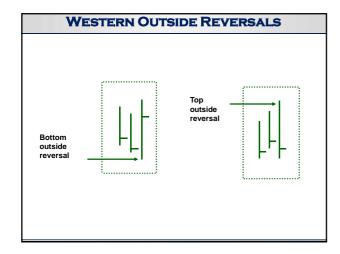

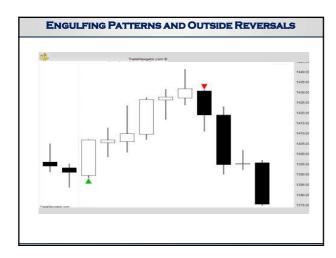

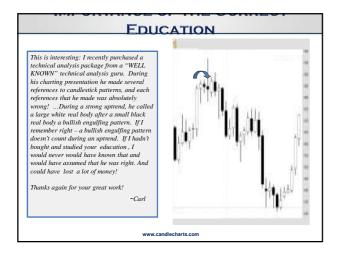

Basic Criteria Market in up trend Opens above prior high (or close) Black candle closes deeply into prior long white candle Market Implication Top reversal Support or Resistance The highest high of the two lines that make up the pattern

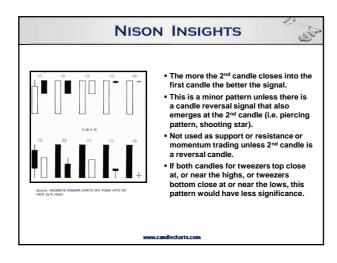

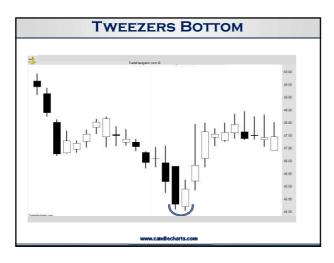

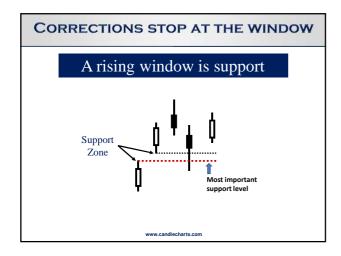

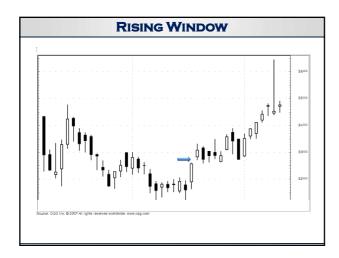

TWEEZERS TOPS AND BOTTOMS CRITERIA Two candles with matching highs (tweezers top) or lows (tweezers bottom) Uptrend for tweezers top and downtrend for tweezers bottom. But trend not critical. The first candle must be a long white (tweezers top) or long black (tweezers bottom) 2nd candle must reflect diminishing of prior force PATTERN PSYCHOLOGY The first candle shows bulls (tweezers top) or bears (tweezers bottom) are dominating. With the second candle showing an inability to continue the move implied by the first candle, we are starting to see the power of the prior trend dissipating.

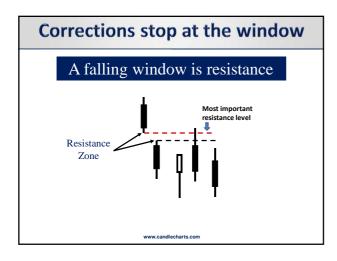

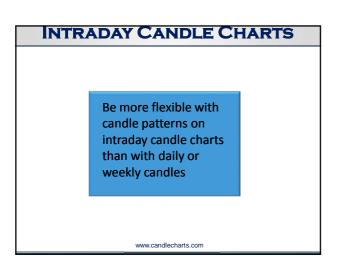

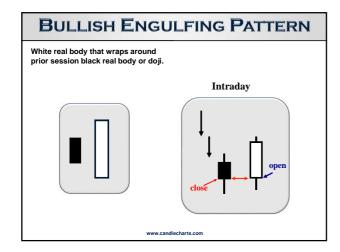

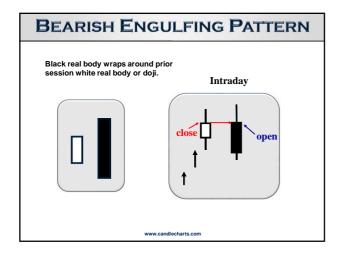

Secrets of Intraday Candle Charts (for Swing Traders): Using Intraday Windows

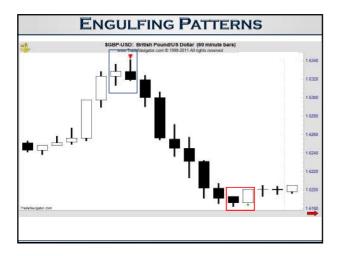

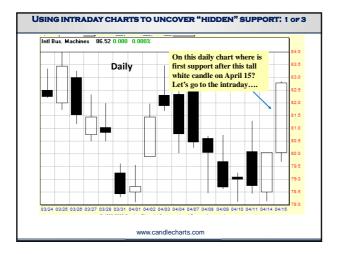

NCS Pro (which includes FX and Intraday modules) takes this variation into account
