DISARMAMENT COMMISSION 1990 substantive session New York, 7-29 May 1990 Agenda item 10

#### OBJECTIVE INFORMATION ON MILITARY MATTERS

# Working paper submitted by the United Kingdom of Great Britain and Northern Ireland

- 1. On 7 November 1989, the United Kingdom introduced in the First Committee of the General Assembly at its forty-fourth session a draft resolution on objective information on military matters (A/C.1/44/L.15/Rev.1). In this draft resolution, like its predecessor 43/75 G of 7 December 1988, the General Assembly would invite States to communicate to the Secretary-General each year measures they have adopted to facilitate the availability of objective information on military matters. The draft resolution built upon its predecessor and asked that the Disarmament Commission include in the agenda for its 1990 session an item entitled "Objective information on military matters", expressing the hope that deliberation would take place resulting in a useful document commanding consensus on the item and thus serving as a guide for the future. The United Kingdom stated that a paper would be submitted to the Secretary-General detailing views on the ways and means of further consolidating the emerging trend towards greater openness in military matters for consideration in the Disarmament Commission.
- 2. There is growing acknowledgement that openness and transparency in military matters make an important contribution to the enhancement of security. To this end, the United Kingdom supports the adoption of measures that ensure that, in all regions of the world, a broad range of objective information is made readily available.
- 3. Since 1986, and in accordance with General Assembly resolution 40/91 B of 12 December 1985, the United Kingdom has annually responded to the exercise on the "Reduction of military budgets" (ROMB) reporting of military expenditures. This gives information on military spending, broken down between the individual armed services and apportioned between support and command functions, equipment,

procurement, operations and maintenance and research and development expenditure. As an example of openness in the provision of information on military expenditures, the exercise has the United Kingdom's support, as would its adoption by a larger number of Member States. Accordingly, the United Kingdom's intention is to continue to provide the information requested by the resolution.

- 4. The British Government's provision of information extends well beyond the ROMB exercise. Amongst the various publications produced each year by the Ministry of Defence, two are noteworthy in the context of openness in the provision of information: the Ministry of Defence chapter of the public expenditure White Paper and the statement on the defence estimates. The first of these, the Ministry of Defence chapter of the public expenditure White Paper, published every January, provides an analysis of spending by major programmes and by defence commitment, and of the allocation of manpower by function. It is a further example of the United Kingdom's continuing commitment to promoting the availability of information on military matters.
- 5. The statement on the defence estimates is presented to Parliament annually by the Secretary of State for Defence. The basic aims of the defence estimates are twofold; it is in part a discussion document, explaining important aspects of British security policy, and in part a report on defence activities and achievements during the year. The important contribution that the United Kingdom continues to make to stability and security is described in full. The statement also describes the level of resources the United Kingdom devotes to defence.
- 6. In parallel with the statement, a detailed compendium of defence statistics is published; this provides an analysis of the defence budget and its relation to defence expenditure. The United Kingdom believes that the availability of such statistics for all States would represent a concrete form of the principles of openness and transparency.

### Confidence- and security-building measures

- 7. By adopting resolution 43/75 G, the General Assembly expressed the belief that the adoption of confidence-building measures would serve to promote openness and transparency of military capabilities and intentions. The successful conclusion in January 1989 of the Conference on Security and Co-operation in Europe follow-up meeting at Vienna paved the way for further negotiations in the field of confidence— and security-building measures which are now well under way, as well as negotiations on conventional armed forces in Europe. The United Kingdom has long held the view that arms reductions are more likely to be achieved if discussed in a climate of confidence already established by agreement on reciprocal measures for greater openness.
- 8. At the new talks at Vienna, the United Kingdom will fully support efforts to build on the package of confidence- and security-building measures concluded by the participants in the Conference on Security and Co-operation in Europe at Stockholm in 1986 and contained in the agreement known as the Stockholm Document. The United

Kingdom notes that participating States have taken seriously their obligations under the Document since it came into effect in January 1987, and welcomes the greater degree of openness and predictability the agreement has introduced into military activities in the whole of Europe, from the Atlantic to the Urals, thereby helping to reduce tension, mistrust and the risk of military confrontation. objective must be to improve the arrangements for notifying military exercises, in appropriate ways. The compliance and verification provisions of the Stockholm Document will also need to be strengthened. An important element of the new generation of confidence- and security-building measures should be the inclusion of a system for more data exchange about the size, type and location of each participating State's armed forces. In particular, Western participants have proposed a system of forward notification of future force plans along the lines of the United Nations instrument of reporting of current data as provided in reports on the "Reductions of military budgets" item (discussed above and attached). This combination of measures should enhance security, develop co-operation in Europe and thereby contribute to international peace and security in the world as a whole.

- 9. The United Kingdom believes that there could be great benefit, in terms of increasing transparency, through the introduction of aerial observation measures. It therefore strongly supports the initiative of the North Atlantic Treaty Organization (NATO) on "Open Skies", not least because of the opportunities for participation this should provide for those nations without their own national technical means. An "Open Skies" régime, in which participants would reciprocally open their airspace to allow aerial surveillance of their territory, will strengthen confidence with respect to military activities. We welcome the progress made towards an "Open Skies" agreement at the conference of CFE nations at Ottawa earlier in 1990, and hope that such an agreement might be reached during the follow-up conference at Budapest in the spring.
- 10. In the field of chemical weapons, the United Kingdom is also encouraging greater openness. It attaches great importance to the negotiations in the Conference on Disarmament at Geneva for a global chemical weapons convention banning chemical weapons, and plays a leading role in those talks. An important element of a chemical weapons convention must be a declaration by all signatories of their current chemical weapons stockpiles and production facilities. The United Kingdom abandoned its own chemical weapons in the late 1950s but has made available much information about its past production, and invited CD observers to the dismantling of the pilot chemical weapons nerve agent plant Nancekuke, Cornwall.
- 11. The United Kingdom has welcomed the bilateral agreement between the United States of America and the Union of Soviet Socialist Republics on chemical weapons reached earlier in 1990; this should help build the confidence necessary for the achievement of a global convention at the negotiations at Geneva. The United Kingdom continues to play its full part in these negotiations. It is conducting a programme of pioneering work on practice challenge inspections of military facilities. This programme is designed to carry forward work on the challenge inspection régime crucial to verification of a chemical weapons convention, and vital for confidence in the convention.

- 12. The United Kingdom believes that the measures outlined in the present paper represent a positive contribution towards building confidence and encouraging openness and transparency in military matters. It further believes that the examples set out in the paper could have wider application, and it therefore encourages all countries to look closely at them with a view to their wider adoption. In particular the United Kingdom recommends careful study of its statement of defence estimates as an example of how reporting of defence capabilities and expenditures could go beyond the United Nations instrument for standardized international reporting of military expenditures. Two areas that would reward careful study, the United Kingdom believes, are attached at annexes I and II. These are extracts from volume 2 of the statement on the defence estimates, 1990:
  - (a) Defence research and development expenditure (p. 18), annex I; 1/2
- (b) Manpower (with civilian/service personnel breakdown) (pp. 23.ff), annex II. 1/

The exchange of objective information in military matters between countries would represent a basic building-block, an essential requirement if real progress in the field of arms control and disarmament is to be effectively pursued. In time this will contribute to increased security world wide as each Government is able to make informed assessments of the military situation in their own region.

### Notes

### Manpower

This section deals with both Service and civilian manpower. For civilians the figures include, up to and including the day prior to change of status, staff employed at the Royal Ordnance Factories which changed to independent Companies Act status on 2 January 1985 and at the Royal Dockyards (Devonport & Rosyth) which changed to contractual management control on 6 April 1987.

The following definitions refer to Service personnel:

Regular Forces comprise both UK Regular Forces and locally entered personnel.

UK Regular Forces are normally recruited in the United Kingdom for full-time service worldwide.

Locally entered personnel are recruited outside the United Kingdom to serve full-time in special formations with special conditions of service. In some cases there are restrictions on the areas in which they are required to serve.

Regular Reserves are former members of the UK Regular Forces who have a liability for service in the Reserves.

Volunteer Reserves and Auxiliary Forces comprise personnel in civilian occupations who undertake to give a certain amount of their time to train in support of the Regular Forces. They also include a number of non-Regular permanent staff and both full and part-time members of the UDR.

Officers designate are candidates for commissioned service who are required to complete successfully a period of training before they are appointed to commissions. Some enter direct from civil life and others are selected from the ranks Figures shown for officers include officers designate.

The numbers shown for females comprise the Women's Services and female members of the Nursing Services. Certain professionally qualified female officers are not commissioned in the Women's Services but in the Branch or Corps appropriate to their qualifications. These officers of whom there were 247 at 1 January 1990 serving in the medical, dental, veterinary and legal specialisations, are included in the numbers of male officers.

Others	16 2	15 7	15 2	13 6	13 5	14 2	14 5

This table covers all UK based non-industrial staff employed within the Ministry of Defence, including, until 1984, those working at the Royal Ordnance Factories and, until 1987, those working at the Royal Dockyards (Devonport and Rosyth)

<sup>2.</sup> Figures are those used for the financial costings.

UK based personnel are those recruited in the UK even though in some instances they may be serving overseas. Locally engaged staff
are those recruited overseas.

<sup>4.</sup> Royal Dockyards (Devonport and Rosyth) staff are included up to 1987 only.

Figures for the current year are as at 1 January.

<sup>3</sup> The open structure was extended in 1984 to Senior Principal and equivalent grades and in 1986 to Principal and equivalent grades thus drawing in staff who were formerly included in the professional, technical, science and other occupational groups

<sup>4</sup> A new administrative group was created from 1 January 1987 covering the former clerical group together with data processing grades who were formerly included in the 'Others' group

<sup>5</sup> Comprising the Professional & Technology Group, the Mapping & Charting Group, the Graphic Officers Group and the Marine Services Group

# 4.11 Civilian apprentices: 1 types of establishment

<sup>1</sup> This table identifies the deployment of UK Regular Forces and MOD civilians. It includes Royal Navy and Royal Marines personnel on board ships in home waters. It also includes staff in Royal Ordnance Factories up to 1984 and in the Royal Dockyards up to 1986.

The source from which these totals are compiled for the Services is different from that used to obtain the United Kingdom element of global deployments. Consequently, the sum of the national figures can differ from the United Kingdom figures.

The figures for Northern Ireland include all personnel from other parts of the United Kingdom and from the British Army of the Shine who
are serving on emergency tours of duty, but exclude the Ulster Defence Regiment.

## 4.14 Deployment of UK manpower: overseas

<sup>1.</sup> The figures include service personnel who are on loan to countries in the areas shown. The Royal Navy and Royal Marines and civilian figures include personnel who are at sea in each area at the situation date. All Defence Attaches and Advisers and their staffs are included under 'Other locations' and not identified within specific areas.

Personnel serving in Northern Ireland on emergency tours of duty but remaining under the command of the Commander-in-Chief, British Army of the Rhine are included in these numbers. Personnel serving on emergency tours of duty in other overseas areas are included in the numbers for that area.

<sup>3.</sup> These figures include personnel stationed in Berlin and Sardinia

## Definitions for Table 4.18

Pre-cadets are Army officer candidates who undertake a short period of service as soldlers prior to appearing before the Army's officer selection board

Officer cadets are entrants who have been selected to serve as officers but who are required to complete successfully a period of training prior to being commissioned

University cadets are students at universities and comparable educational establishments who have been appointed as midshipmen in the Royal Navy. as acting second fleutenants in the Royal Marines or as officers in the Army and Royal Air Force and who, on graduation, will take up whole-time duty with the Services.

Shows those entering the department from outside the Civil Service and those leaving both the MOD and the Civil Service. The net gains or losses for individual groups in this table do not account entirely for the year to year changes in the corresponding group strength shown in Table 4.11, since transfers between groups, movements from industrial to non-industrial grades and exchanges with government departments are all excluded.

Recrultment and losses for Royal Ordnance Factories are included up to 1 January 1985 and for Royal Dockyards (Devonport and Rosyth) up to 5 April 1987.
 Royal Fleet Auxiliary crews and some staff serving on ocean weather ships are excluded

<sup>1</sup> Shows the numbers of personnel leaving the UK Regular Forces possessing certain skills useful to the civilian.community. Only personnel in readily identifiable groups of reasonable size have been included. Personnel are classified according to their primary employment in the Services at the time of leaving, in the case of Army officers by the function of their Arm or Corps. Each group covers the full range of skills from the professionally qualified to the semi-skilled.

<sup>2</sup> Comprising all personnel trained in the control and operation of wheeled and tracked vehicles.

<sup>3</sup> Comprising all personnel trained in the control and operation of communications systems.

<sup>4</sup> Comprising doctors, dentists, nurses and supporting staff.

<sup>5</sup> Comprising flying and ground control personnel.

<sup>6</sup> Including physical education instructors other than those with skills covered by other categories.

<sup>7</sup> Including officers of the rank of Captain RN and above, and equivalent ranks in the other Services, not included in other categories

<sup>1</sup> Indices cover adult male UK Regular Forces and are based on the average rate of basic pay through the year. Weightings are based on paid strengths at April 1984 but exclude doctors, dentists, chaptains, legal and educational officers

In 1983-84, increases for Senior Officers were delayed and phased to 1 August 1983 and 1 January 1984. Rates for Generals and equivalent were £40,500 at August and £42,750 at January.

In 1984-85, increases for all ranks were phased to 1 April and 1 November 1984. The 1 November salaries are shown in the table. At 1 April, the salary for General and equivalent was £44,030; the salaries for other officers were between 4.2% and 5.3% lower than the 1 November levels and the salaries for servicemen were between 3.5% and 4.3% lower than the 1 November levels.

In 1985-86, increases for Senior Officers were delayed and phased to 1 July 1985 and 1 March 1986. Rates for Generals and equivalent were £52,750 at July and £60,000 at March.

in 1986-87 increases for all ranks were delayed until 1 July 1986

In 1987-88, increases for Senior Officers were phased to 1 April and 1 October 1987. Rates for Generals and equivelent were £64.739 at April and £65,000 at October.

In 1988-89, increases for Senior Officers were phased to 1 April and 1 October 1988. Rates for generals and equivalent were £67.602 at April and £68,500 at October.

----

<sup>2</sup> In the Illustrative rates for officers, the mid point of the incremental scales has been used. For servicemen, the pay bandings have been selected which contain the largest number at each rank. Within each rank servicemen are divided for the purposes of pay into classes, bands and scales according to their employment classification, the nature of their specialisation and the period of commitment to serve. All forms of additional pay, e.g flying pay, diving pay, parachute pay are excluded since they are not paid to the majority of Service personnel.

<sup>3</sup> Salaries shown are the rates payable from 1 April in each year except in the following cases:

<sup>4.</sup> Includes length of service increments — £402.60 (1983-84), £401.50 (1984-85), £456.25 (1985-86), £492.75 (1986-87), £530.70 (1987-88), £565.75 (1988-89) and £602.25 (1989-90).

<sup>5.</sup> Includes length of service increments — £237.90 (1983-84). £237.25 (1984-85), £273.75 (1985-86). £292 (1986-87), £311.10 (1987-88), £328.50 (1988-89) and £346.75 (1989-90).
