DISARMAMENT COMMISSION
1991 substantive session
New York, 22 April-13 May 1991
Agenda item 4

OBJECTIVE INFORMATION ON MILITARY MATTERS

Working paper submitted by the United Kingdom of Great Britain and Northern Ireland

At the 1990 session of the United Nations Disarmament Commission the United Kingdom presented a working paper for the item "Objective information on military matters" (A/CN.10/140 of 8 May 1990). That working paper gave general views on the item for the 1990 introductory discussions. For the 1991 session, the United Kingdom now submits a further paper with a view to forming agreed specific objectives and recommendations in the Disarmament Commission for concrete further action. It believes the structure of "Objectives, principles and mechanisms" advanced by the Soviet Union in 1990 (A/CN.10/142) is a useful one to pursue and will adopt this structure here.

Objectives

To encourage openness and transparency on military matters as a confidence-building measure for arms control and disarmament;

To avert crises and reduce the risk of military conflict, whether intentional or unintentional, by heading off dangerous misperceptions on competing sides;

To increase the predictability of military activities.

Principles

Recognition that measures to promote openness and transparency in military matters shall not entail the diminishing of States' security;

Across the board equality of States' rights, including their equal right of access to information obtained under multilateral agreements;

Consistency of the volume and range of information with the objectives of the regime of openness;

Provision of information on a regular basis;

Information should be accurate and subject to agreed procedures and, if appropriate, subject to verification;

Measures to promote openness and transparency may be unilateral, bilateral or multilateral, and may use the potential of the United Nations.

Mechanisms

The existing standardized United Nations reporting system for military expenditure should be adhered to by more States and its scope could be expanded;

Another regime could be established (or the above could be expanded) to deal with the provision of data on armed forces and armaments of Member States. The breakdown of forces could be simple (as exemplified by the annexed* summary of strength of armed forces in the United Kingdom statement on defence estimates);

More consideration should be given to an international register of arms sales under United Nations auspices. Such a register, provided it was universal and non-discriminatory, would have tangible benefits. The current United Nations Study on international arms transfer is important in this context;

Mechanisms need not use the United Nations. Unilateral measures (like the United Kingdom annual statement on defence estimates) help promote openness as do appropriate bilateral steps. Multilateral regional arrangements might also be desirable.

* Annex in English only.

1. Parts of guided weapons and missiles are included from 1987, and parts of military aircraft are included from 1988. Figures for earlier years exclude the trade in "parts".
2. Including debt interest and allowance for non-trading capital consumption not allocated to specific services.
3. Provisional estimate.
