The conclusion of the Treaty between the Russian Federation and the United States of America on the Further Reduction and Limitation of Strategic Offensive Arms was a real step forward in the field of nuclear disarmament and a major achievement of 1993. The Russian-American declaration adopted on 4 April 1993 in Vancouver confirmed that Russia and the United States are moving resolutely towards the earliest possible entry into force of the START I Treaty and ratification of START II. These agreements, which greatly reduce the level of nuclear danger, open real possibilities for involving other nuclear Powers in this process.

In the next two years these efforts could be directed essentially to elaborating a package of agreements which would ensure a total and comprehensive ban on nuclear tests. In this connection to begin as soon as possible preferably in the framework of the Geneva Conference on Disarmament, multilateral consultations or talks on the banning of nuclear-weapon tests, taking into account the special role which the five nuclear Powers play in this area.

Among the priorities of multilateral disarmament, first and foremost nuclear disarmament, Russia attaches particular importance to the strict and consistent implementation of the agreements that have already been concluded.

In this context, it is important that the agreements in the sphere of nuclear disarmament should be implemented in the territory of the former USSR,

and that the Republic of Kazakhstan and Ukraine, as well as the other States of the Commonwealth of Independent States which have not yet taken the necessary steps, should accede to the Treaty on the Non-Proliferation of Nuclear Weapons as non-nuclear States at the earliest possible date. Russia strictly observes these Treaties and is prepared to assist the parties concerned in the implementation of the obligations undertaken by them pursuant to these agreements.

As we draw closer to the Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons which is scheduled for 1995, the international community must mobilize its efforts to the maximum degree with a view to strengthening the regime of this Treaty. The forthcoming Conference can be an important stage in conferring on the Treaty a global and permanent character.
