Draft resolution submitted by the Spanish delegation to Committee I of the Conference of Non-Nuclear-Weapon States

The Conference of Non-Nuclear-Weapon States,

Having regard to the importance of safeguards for the purpose of preventing the proliferation of nuclear weapons,

Considering that all collective inspection should be based on the principle that every country inspected must be adequately represented in the agency responsible for carrying out the inspections,

Considering that, in the present structure of the International Atomic Energy Agency, many countries are not adequately represented in the Board of Governors, which is the organ responsible for safeguards in that Agency,

Recommends the establishment within the International Atomic Energy Agency of a special committee on safeguards of which countries possessing nuclear facilities or supplying nuclear materials may be members if they so desire. The special committee on safeguards should be responsible for setting up and, if necessary, modifying the Agency's system of safeguards and for supervising the strict observance of that system.
