Pakistan: draft resolution

The Conference of Non-Nuclear-Weapon States,

Believing that freedom of access to scientific institutions and nuclear establishments engaged in research and development of the peaceful uses of nuclear energy, as well as access to scientific and technological information in the nuclear field among the non-nuclear-weapon States and between the non-nuclear-weapon States and the nuclear-weapon States, leads to the promotion of nuclear technology,

Realizing that technical assistance rendered by nuclear-weapon States and such non-nuclear-weapon States as have advanced in the field of nuclear technology through bilateral or multilateral channels, to those non-nuclear-weapon States which are less advanced, helps them to acquire the benefits of nuclear technology,

Considering the importance of strengthening all possible measures to prevent the proliferation of nuclear weapons,

Requests all nuclear-weapon States and those non-nuclear-weapon States which are in a position to do so, to provide access for students and scientists for purposes of training and acquisition of knowledge on a non-discriminatory basis to their scientific institutions and nuclear establishments engaged in research and development of the peaceful uses of nuclear energy;

Urges all nuclear-weapon States and those non-nuclear-weapon States which are in a position to do so, not to provide (a) source or fissionable material, or (b) equipment and material especially designed or prepared for the processing, use or production of special fissionable material, to any recipient non-nuclear-weapon State, unless such recipient State has accepted safeguards as set forth in an agreement to be negotiated and concluded in accordance with the Statute of IAEA and the Agency's safeguards system.
Urge further that in cases where nuclear-weapon States and non-nuclear-weapon States are parties to a multilateral treaty within a particular region which provides for co-operation in the peaceful uses of nuclear energy, including mutual exchange of (a) source and fissioneable material or (b) equipment or material especially designed or prepared for the processing, use or production of special fissioneable material, the safeguards provision of such treaty should continue to apply till such time as negotiations relating to safeguards, between the parties to such a treaty and the IAEA on an individual or collective basis, are considered conducive to the conclusion of an agreement.
