

Which is better for your skin: an orange peel, cottage cheese, or a mattress?

In the battle against cellulite, you have to think outside the box.

So, I'm gonna show you the newest breakthrough method to **improve your skin** and **raise your grade** on the *Cellulite Severity Scale*...

What? Another scale to haunt us?... I know it's not easy, but stick with me.

See how you rate.

Grade 1: "*Orange-Peel*." Your skin is smooth when you stand up, but mild dimpling appears when you sit down.¹

Grade 2: "*Cottage Cheese*." Your skin has moderate dimples when you stand up or sit down.²

Grade 3: "*Mattress*." Your skin has severe dimples when you stand up or sit down with deep peaks and valleys.³

I'm embarrassed to tell you I used to be a Grade 2 until I discovered a natural, at-home technique for **smoothing out cellulite** by shrinking fat cells...

Yes, I said a *technique* for **shrinking fat cells**...

In clinical trials, this easy method reduced **cellulite on thighs by up to 9.5% after 28 days - and over 11% after 56 days!**⁴

Jen: I definitely see the difference, less dimples.

Selena: I have noticed a smoothing and a reshaping in my thighs. It's like pockets of cellulite in my thighs that were really noticeable before, and now they're smoothing out.

Nancy: It was like, "Oh! Okay." It was definitely noticeable. Around 50 percent smoother. Before, it really looked like cottage cheese.

Now, the *Scale* is a way to track *progress* and **celebrate success**.

⁴ <https://drive.google.com/drive/u/1/folders/1UDUlpvvhUOOUUnFzH5qcC61Dr-ITOn-B8>

So what's this cellulite-smoothing method I'm talking about?

It's a delicious elixir that floods your system with key nutrients that naturally flush your body's fat cells, smoothing out cellulite, boosting the skin, and trimming down waistlines.

Nancy: It's almost too good. Yeah. I didn't expect it to be quite honest.

Ladies.... Can we talk about cellulite?

There are few words that have the power to instantly destroy the confidence of a grown woman like the word "cellulite."

I don't know many words that played a bigger role in the decision of which swimsuit to buy than the word "cellulite."

But what if I said one of these three fruits could wipe that all away?

I've heard it called silly names...

Like "cottage cheese skin" or "orange peel arms"

But I think we can all agree...

There's nothing funny about cellulite.

We hate it!

And we're willing to do anything to get rid of it.

But here's a fact - no one is suffering from this alone:

Over 90% of women have cellulite.

JEN: I had worn skirts on the beach for years because I was trying to hide my legs. Now I definitely see the difference, less dimples, less things that I'm embarrassed about.

And to make matters worse cellulite increases as we get older.

NANCY: The cellulite in my thighs has kept me from wearing shorts since junior high. Everybody's wearing their shorts and their tank tops and I'm wearing capri jeans. I do not own shorts.

Cellulite happens to everyone... whether you're plus-size, curvy or EVEN skinny.

And it's not just an external problem, cellulite has been shown to cause emotional and psychological damage to 80% of adult women.⁵

It can really break us down... Listen to Lisa's experience...

Lisa: I hate that something so stupid like cellulite had such a hold over my life. I just really let it make me so small and introverted. And I never realized how bad it was till I was able to take back control of my skin.

Over the years, there have been thousands of products promising to rid our thighs, bellies and arms of cellulite...

From creams, painful rollers, and lasers, to invasive surgeries that take months to work and cost tens of thousands of dollars...

But none of them have been scientifically proven to get rid of yucky dimpled skin...

Until now.

A new clinical study revealed an amazing all-natural breakthrough that till now has only been an exclusive VIP secret of high end spas available only to the rich and famous.

This transformative discovery not only reduces cellulite,

It smoothes wrinkles, shrinks fat cells, and can cut inches from your waist and hips.

It hydrates and tightens skin, while also protecting it from harmful UV rays.

And best of all..

The treatment is so simple, it can be done at home in less than 30 seconds a day.

Listen to these amazing results:

⁵ <https://www.seppic.com/en/sod-b>

In clinical trials, cellulite was reduced on thighs by up to 9.5% after 28 days - and up to 11.3% after 56 days.⁶

Jen: So my daughter tells me I'm glowing, I look good. And at one point, she's like, "We're the same weight."

Selena: I started writing down the, my measurements at the start of the Lemon Sips first interview. And my hips went down two inches, easy. So that's fun. That's super fun.

Shatareia: When I'm looking, like at my cellulite, it looks like it's, you know, kind of trying to slip away here (laughs). I was like, "Oh, wait a minute," you know? "This is looking better than what it was before."

And those pesky fat cells under the skin...?

Yep, they were reduced by up to 25% on average after 90 days.

"I'm getting smaller. Like, I'm losing my waistline, other people are like, "You look really good today!" I'm like, "Yes! It's the Lemon Sips, I swear." (laughs)"

Camille: The tenacity of my skin has become tighter so that the look of cottage blemish, is slowly disappearing. And Lemon Sips will be my go to for a long time.

Michelle: I lost two inches in my waist and two inches in my hips and two and a half pounds, which I had no idea. That's like a jeans size. In a month. It's, I think, like, kind of amazing.

Exciting, right?

I'm here 'cause I've seen the dramatic difference it's made in my own life...

In my own skin!

Hi. I'm Dr Kellyann Petrucci, but most people call me Dr Kellyann.

I'm a doctor specializing in biological medicine, a certified nutritionist, and a New York Times bestselling author.

⁶ <https://drive.google.com/drive/u/1/folders/1UDUlpvxhUOOUnFzH5qcC61Dr-ITOn-B8>

My simple, straightforward approach to weight loss and anti-aging has empowered hundreds of thousands of people helping them transform their skin, their weight and their lives.

And now, I have something new that I can't wait to share with you...

To help you transform your life, your thighs, your stomach and your hips...

But first, let me tell you a story about myself.

I had just filmed the show, The Doctors

And went back to the hotel to take a dip in the pool.

When I talk all day about weight loss and anti-aging well, I better look like I'm living out my own advice.

Most of the time, I work hard at eating right, getting enough sleep, and making sure I keep my stress to a minimum.

So you can imagine my surprise when I was getting out of the pool and my friend said, "Whoa... I thought with all the bone broth you drink you wouldn't have cellulite!"

I couldn't believe it! I was so embarrassed, and I have to tell you the truth, I felt a little heartbroken!

I ran back to the room... stood in front of that big mirror... and freaked out!

I knew that cellulite was a problem... but now, this was personal!

I immediately called my team together and said - we need to figure this out.

And I'm here to tell you... it wasn't easy but after years of study and research...

On two different continents...

With different sets of doctors, scientists and nutritionists all focused on solving one big problem:

How do we get rid of cellulite once and for all?

I'm proud to say that work paid off and we discovered THE ONLY clinically-proven solution for reducing cellulite and it's already changing the lives of those who've tried it.

Yolanda: I was feeling frustrated. Like, uh, my body's getting older and it's not gonna change. Now my skin is tight. Less cellulite. Less sagginess.

Candis: I'm getting compliments on my skin! (laughs) People are like, "What are you doing?"

Laurie: It's the silent stalker of cellulite. I was a bit of a doubting Thomas, but I am seeing a difference with cellulite areas, which is a little shocking. Shorts are back on the table at this point. So that's a good thing.

Sounds too good to be true, right?

I still remember staring in the mirror and feeling like "URGH...."

and just wished I could have a do-over.

I wanted a magic eraser that could just wipe the slate clean on my skin and let me start again.

And now, years later...

Science has discovered that magic eraser...

And it comes from a tiny field in the south of France.

Farmers were growing a new kind of melon, but it didn't sell very well because it wasn't sweet.

Since no one was eating it, there was no rush to harvest it.

But something really interesting happened...

The farmers began to notice no matter how long that melon sat there in the sun, The skin of that fruit never spoiled.

It still looked brand new.

Our minds were racing. As scientists, we just had to know.

What the heck is going on in that melon that keeps it's skin from aging?

The answer to that, my friends, is where science and magic meet.

More on that in a minute.

Before I tell you how we're able to attack that lumpy flesh on the thighs and stomach...

Let's talk about how cellulite works, so we can understand how we go about getting rid of it!

Ladies, here are some hard facts about the way we're built.

Did you know that there are places on our bodies where we have 3 layers of fat?

And here's a strange coincidence...they're in the exact same locations we get cellulite!

That's right!

In our thighs, our hips, stomach and the back of our arms.

Did you know that estrogen makes fat?

If that's not enough, in each of our fat cells, there are two receptors...

One of them makes fat - and the other breaks it down.

In our thighs, for every one receptor that breaks down fat, we have 9 that are working overtime creating it.

Our bodies are basically one giant fat making machine!

And as we get older, our fat cells grow bigger and bigger,

and the only thing holding them back is collagen.

Think of collagen like a picket fence...

Fighting the good fight, doing all it can to hold back the fat...

Unfortunately, as we age, that collagen fence starts to fray and break down...

So the fat eventually breaks free, determined to race to the surface of our skin.

What's left of our collagen is like that old picket fence...

It's okay in some places, but broken down and missing planks in other places.

Adding insult to injury, our skin becomes thinner and thinner as we age so once those giant fat cells get past that collagen fence, it doesn't take much to poke through the surface of our much thinner skin.

When you take all these factors into account... It almost starts to feel as if our body is conspiring against us!

No wonder why 90% of us are struggling with cellulite!⁷

When I first understood the science behind cellulite, it felt overwhelming.

But when I thought about all the different products that people I knew bought over the years that promised to get rid of their cottage cheese thighs but never worked, I started to get angry.

It makes sense why most cellulite creams, and painful rollers don't solve the problem...

It's a topical solution to a problem that begins under the skin!

To get rid of cellulite, I needed to find a way to flush the fat, smooth the skin, soothe the skin, and support the skin...

And it needed to start from the inside out.

I can tell ya... this felt like it might be an impossible task.

Cause up till now, the brightest minds in the science and beauty business

⁷ <https://www.scientificamerican.com/article/is-cellulite-forever/>

hadn't figured out a way to crack it...

But, as they say, timing is everything.

When we finally started looking for a solution to cellulite,

Those crazy French farmers were wondering about their ageless melon.

And just like that... science and magic came together!

When we figured out why that melon didn't rot in the sun, we had no idea we would open up a treasure chest of skin care secrets!

What was happening inside that powerful melon was the key to reducing cellulite, wrinkles and waist and hip sizes.

Here's the skinny: The secret was that french melon was jammed full of an incredibly high concentration of one of the most powerful antioxidants we know:

Superoxide Dismutase or SOD B.

There are many uses for this incredible enzyme, but what was truly shocking was how it worked on cellulite and aging skin.

Starting with: This magic melon can flush the fat!

We can all use a good fat flush, am I right?

I'm talking about the bumpy, lumpy, yucky fat that clings to us in all the wrong places.

We know that a big problem with cellulite is the hypertrophy of our fat cells...

Which basically means: our fat cells are just way too fat!

The bigger they are, the more room they need, so in the fight for space, they destroy everything in their way and push their way to the surface of our skin!

But this melon extract attacks those giant fat cells...

And flushes that fat by reducing those overweight cells by 43%! That's almost cutting them in half!⁸

This is huge! That means a visible reduction in cellulite...

And the start to cutting inches off our waist and hips as well!

But that's just the first step...cause flushing the fat alone isn't enough!

Now we need to rebuild the "beams and rafters" that are holding up the roof of our skin to stop that "dimpling effect" that creates those "cottage cheese thighs."

Once again, our magic melon extract stimulates our body to go into overdrive,

producing 3 of our top defensive antioxidants that work together to not only stop our collagen and fibrous materials from being destroyed...

but to rebuild them and make them stronger than they were before!

This helps to smooth our skin, strengthen our skin and tighten our skin!

It's like rolling back the clock on aging and getting a second chance!

But we didn't wanna stop there...

To boost and support the effects of our french melon, we added one more simple, natural, and effective ingredient:

Lemons.

Next to the French melon, lemons are my absolute favorite.

Lemons help detoxify and flush harmful toxins from our bodies.⁹

They also rehydrate and nourish our skin.

⁸ <https://www.nutraceuticalsnow.com/articles/2016/01/25/sod-b-dimpless/>

⁹ <https://drive.google.com/file/d/1l0pyQlnXbl0vA3BfjdieGxzK8Qj7Ce3y/view>

On top of all that, they provide a healthy boost of energy and quench our strongest thirst.

So after years of research and development, I'm so excited to introduce you to Lemon Sips!

Lemon Sips are sugar-free, fat-free and absolutely delicious.

Combining the treasure trove of skin and body benefits from our french melon with the power of lemons in one simple, easy to prepare drink.

Just add water and enjoy!

Marlene: "I loved the lemon sip, I loved the fact that there was no sweetener in it. It was just lemon water and that just feels like you're cleaning. I loved that."

Yolanda: My husband is realizing I'm feeling more happy- happier. Yeah, and my friends are like, "Ah, what are you doing?" (laughs)"

Laurie: I think that's the part that's the most deceptive because it feels like if you're gonna get any sort of progress you ought to be, um, you know, sweating, painful, something. But this feels really easy and, so, yeah. I've told friends about it. They're all excited, so, yeah. May have a whole contingent of groupies from the Midwest. (laughs)

I love that... I want you to feel good, inside and out.

Lemme say, I know what it's like to look in the mirror and feel the opposite.

I remember standing there, looking at my cellulite and thinking ".....Really?!?!"

There are so many things in life that are hard enough.

Do we really need our own bodies to turn against us as well?

I wanted my skin to be like it was before - smooth and tight and glowing...

But I didn't have it.

I wanted that do-over. I wanted that magic eraser... I wanted to get rid of that cellulite!

We all want that right?

Our bodies crave rejuvenation.

Our bodies want to be alive, vibrant and healthy.

It's just waiting for us to provide it with the right materials to refresh itself.

To transform itself.

It's really that simple.

But there are so many voices, so many choices, so many products.

It's so hard to make a decision that we end up not making one.

So let me make it easy for you.

Forget about everyone else for a moment and just listen to me:

I'm a doctor with 25 years of experience. I know things.

This french melon is the only scientifically proven way to reduce your cellulite.

The results are real. They are proven.

And all it takes is 30 seconds a day.

I can't make it any easier!

Kiebpoli: "The lemon sip felt like an old friend."

LADAWN: "My skin is glowing. I feel more radiant. I feel energetic."

MARIAN: "I actually have had friends specifically comment on my skin and how glowy it is, which I love."

Kera: I feel amazing. I feel so, so good. I can definitely tell the difference since I started taking Lemon Sips. I feel healthier. I feel like the biggest difference is just, in general, how my body feels. And I've definitely noticed a difference in my skin, too.

Jen: I've lost inches on my thighs and my waist due to the lemon sips. I said to my husband, "This is great. We just need to buy a new wardrobe now." Especially as I go back into the office. These things don't fit me anymore.

Let this be your first step towards turning your skin, your health, your body around.

It's time to rejuvenate yourself now!

With one glass of Lemon Sips, we make the decision to take control of our skin...

To help reduce that nasty cellulite,

To smooth out those wrinkles,

To cut inches off your waist and hips,

And claim that healthy, glowing, beautiful skin that we've always dreamed of!

Come on.

What are you making excuses for?

Isn't it time to make a change and start seeing real results?

I created Lemon Sips to be the easiest way to start taking care of yourself.

But I wanted it to be at a price that anyone can afford.

So by trying Lemon Sips today you're not going to pay \$100... or \$75...

Heck, you're not even going to pay \$50!

When you order today, you'll only pay \$45.

At that price, what have you got to lose... besides that cellulite!

I put my heart and soul into crafting this cellulite busting elixir.

I wanted Lemon Sips to not only taste great, help reduce dimpled thighs, wrinkles and your waist and hip size...

I wanted it to be a product that is so simple, so easy to integrate into your daily routine...

That you have no excuse to not start today. Right now.

Come on, this is the turning point... the moment you've been waiting for.

Take back control of your body...

It's as simple as clicking a button.

There is one thing I have to tell you.

I don't have an endless supply of my lemon goodness.

In fact my first batch sold out in days.

So I encourage you to stock up so you won't run out.

If you order a 3-month supply today, you'll save \$21...

And if you go for a 6-month supply, you'll save \$54!

With this special offer... our inventory is already limited... so it's a good idea to get at least a 3 month supply to really maximize those results and kick start the beginning of a brand new you.

When you invest in yourself, there is absolutely no risk at all.

That's how much I believe in this product.

Try Lemon Sips and get these amazing results for yourself.

It's time to make a change, and there is simply no easier way to start..

But as I said, my first supply sold out so quickly... all 15,000 jars!

Now, we put together a much larger batch this time around... but you should know a new batch can take months.

Because our ingredients are exclusively sourced... like our magic melon, all the way from the fields of France.

So, if you want to see the difference that the only clinically proven way to get rid of cottage cheese thighs can make, then let's go!

The time is now...

Click the button below and join the thousands of others who have already seen the amazing power of Lemon Sips reduce their cellulite and change their lives.

Shatareia: I'm so happy with the results. It is like a little boost, like, "Okay, it's smoother." And, you know, you don't have to worry about, like, "Are people, like, staring at my cellulite on my legs?"

Brooklyn: You do feel a little glowy when you drink them. Like, it just adds this little punch that you're like, "Oh, I never knew." (laughs)

Yolanda: I really feel more confident. I'm sexy again. (laughs) I feel sexy again. You know?

These are real people with real results, taking control of their skin and their lives!

It's time to stop letting that bumpy, lumpy unsightly fat control us!

It's time to feel free to wear shorts...whenever we want!

and to go to the pool... even in a bikini!

And go out without shame or embarrassment because we're sick of cellulite - and we're not gonna take it anymore!

With Lemon Sips we are offering a simple, tasty, clinically-proven way to get rid of that lumpy skin in less than 30 seconds a day.

What are you waiting for?!?

Claim the change for yourself and kiss cellulite goodbye by simply clicking the button below.

You are fabulous and beautiful and you deserve to feel that way both inside and out.

It's time to take that Next Step by clicking the button below.

Because I can't guarantee how long this current supply will last... and I don't want you to miss out on this incredible opportunity.

So don't wait a second longer to start your transformation.

The beginning of the rest of your life starts right now.

Here's my big Italian kiss! Muah!

Love you all!

Ciao Bella!
