RE: Material Testing

Dear Danielle:

As requested, AAA Lead Inspections, Inc. had the sample you submitted sent out to be analyzed for the presence of asbestos. The samples were sent to SanAir Technologies Laboratory, Inc. in Powhatan, Virginia. SanAir is a certified laboratory that participates in the National Voluntary Laboratory Accreditation Program (NVLAP), which is required for asbestos analysis.

The result from the samples are as follows:

Sample #	Description (Location)	Result
4901-1	Ceiling Tile	None Detected

An Asbestos-Containing Material (ACM) is defined by the Environmental Protection Agency (EPA) and the Occupational Safety and Health Administration (OSHA) as a material that contains more than 1% asbestos as determined by polarized light microscopy (PLM). Based on the laboratory results, the sample you submitted does not contain asbestos.

This report only pertains to the materials which were submitted and is by no means a full asbestos inspection report for the building. Further renovation work would require additional sampling and investigation.

I have also included a copy of the laboratory results. If you have any questions, please feel free to contact me at (616) 364-9200.

Sincerely,
AAA Lead Inspections, Inc.

Dear Catherine Phelps,

We at SanAir would like to thank you for the work you recently submitted. The 1 sample(s) were received on Friday, December 11, 2020 via FedEx. The final report(s) is enclosed for the following sample(s): 1.

These results only pertain to this job and should not be used in the interpretation of any other job. This report is only complete in its entirety. Refer to the listing below of the pages included in a complete final report.

Sincerely,

Disclaimer

This report is the sole property of the client named on the SanAir Technologies Laboratory chain-of-custody (COC). Results in the report are confidential information intended only for the use by the customer listed on the COC. Neither results nor reports will be discussed with or released to any third party without our client's written permission. The final report shall not be reproduced except in full without written approval of the laboratory to assure that parts of the report are not taken out of context. The information provided in this report applies only to the samples submitted and is relevant only for the date, time, and location of sampling. The accuracy of the results is dependent upon the client's sampling procedure and information provided to the laboratory by the client. SanAir assumes no responsibility for the sampling procedure and will provide evaluation reports based solely on the sample(s) in the condition in which they arrived at the laboratory and information provided by the client on the COC, such as: project number, project name, collection dates, po number, special instructions, samples collected by, sample numbers, sample identifications, sample type, selected analysis type, flow rate, total volume or area, and start stop times that may affect the validity of the results in this report. Samples were received in good condition unless otherwise noted on the report. SanAir assumes no responsibility or liability for the manner in which the results are used or interpreted. This report does not constitute and shall not be used to claim product certification, approval, or endorsement by NVLAP, NIST, or any other U.S. governmental agencies and may not be certified by every local, state, and federal regulatory agencies.

Samples are held for a period of 60 days. Fibers smaller than 5 microns cannot be seen with this method due to scope limitations.

For NY state samples, method EPA 600/M4-82-020 is performed.

NYELAP Disclaimer:

Polarized- light microscopy is not consistently reliable in detecting asbestos in floor covering and similar non-friable organically bound materials. Quantitative transmission electron microscopy is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos containing.
