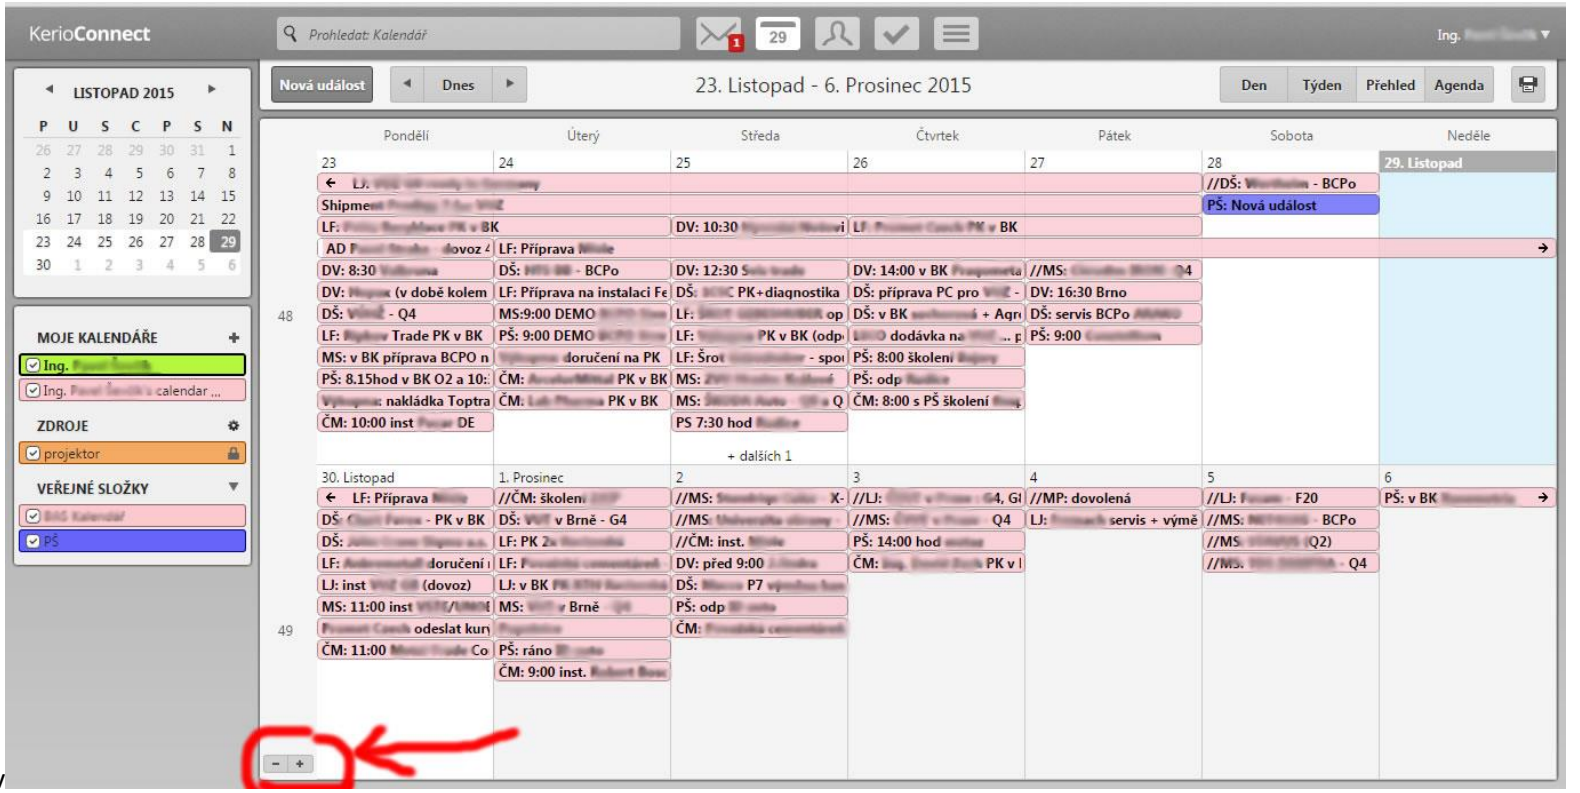
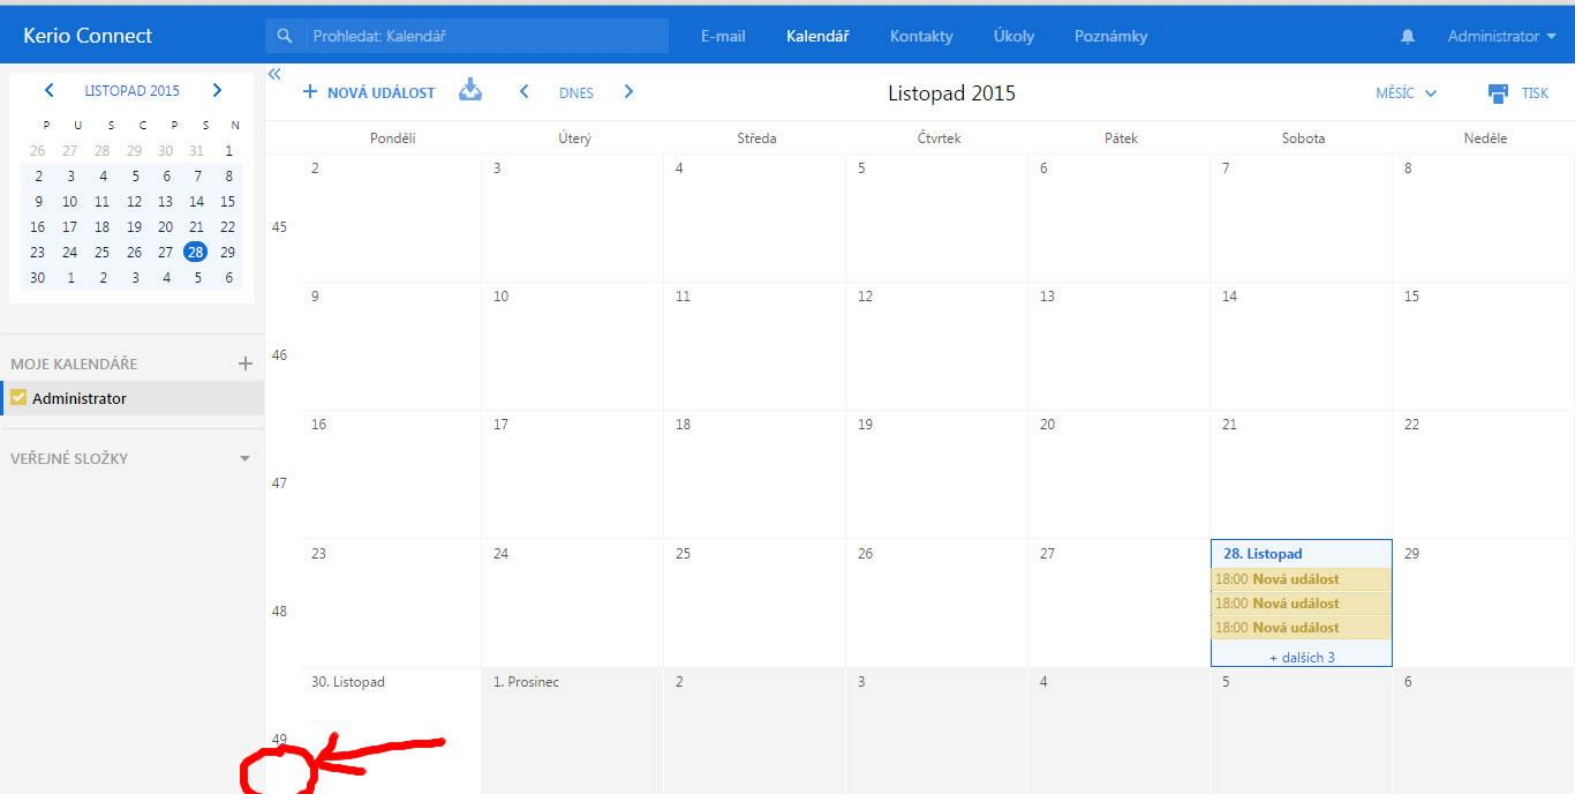
Kerio Connect 8.5.2 does have the add/remove week button allowing user to reduce showing the + 1 more, +2 more and seeing practically all events without need of clicking a tone moment on one screen.



v


In Kerio Connect 9.0.0 this button / functionality is missing as per image below and user is getting instantly + 3 more, etc in view without any possibility to change this … either the adding of button is needed or the original functionality of old WebMail when all evenets of the day were shown is needed.
