

Please add "Replace" function to "VARIABLES" of recording module.

Allow users to change multiple variable names at once.

Idea:

The screenshot shows the 'Edit Variables of Recording1' window. The title bar is 'Edit Variables of Recording1'. Below the title bar is a toolbar with icons for 'Add Variable', 'Remove unused Variable(s)', and 'Copy Variable from Repository'. A 'Replace' button, represented by a double-headed arrow icon, is highlighted with a red dashed box. A red callout bubble points to this button with the text 'Add an "Replace" function here.' Below the toolbar is a table with two columns: 'Name' and 'Default Value'.

Name	Default Value
DATA0	6
DATA1	3
DATA2	1
DATA3	4
DATA4	5
DATA5	2

The diagram illustrates the transformation of variable names. It shows two screenshots of the 'Edit Variables of Recording1' window. The left screenshot, labeled 'Before', shows a list of variables: DATA2, DATA5, DATA1, DATA3, DATA4, and DATA0. A red dashed box highlights this list. A large red arrow points from this list to the right screenshot, labeled 'After', which shows the same list of variables but with the prefix changed to TEST: TEST0, TEST1, TEST2, TEST3, TEST4, and TEST5. A red dashed box highlights this list. A red callout bubble with the text 'Replace "DATA" with "TEST".' is positioned above the arrow. Below the 'Before' and 'After' screenshots are red callout bubbles with the text 'Before' and 'After' respectively.
