

Microsoft Teams & Audio Conferencing Request

Request - Provide Option to Set Microsoft Audio Conferencing Personal Identification Number (PIN)

For Microsoft Audio Conferencing users, the Microsoft Teams meeting invitation includes a "Reset PIN" link - <https://mysettings.lync.com/pstnconferencing>. After logging onto the Office 365 Portal, the user is presented with a "Reset PIN" button that generates a new random Personal Identification Number. Can you please give the user the option to set his\her PIN to a number of his\her choosing provided it meets the defined length requirement and basic complexity requirements (non-repeating, non-sequential)?
