

Azure Sphere

Devices secured on Azure

Your app data, anywhere.

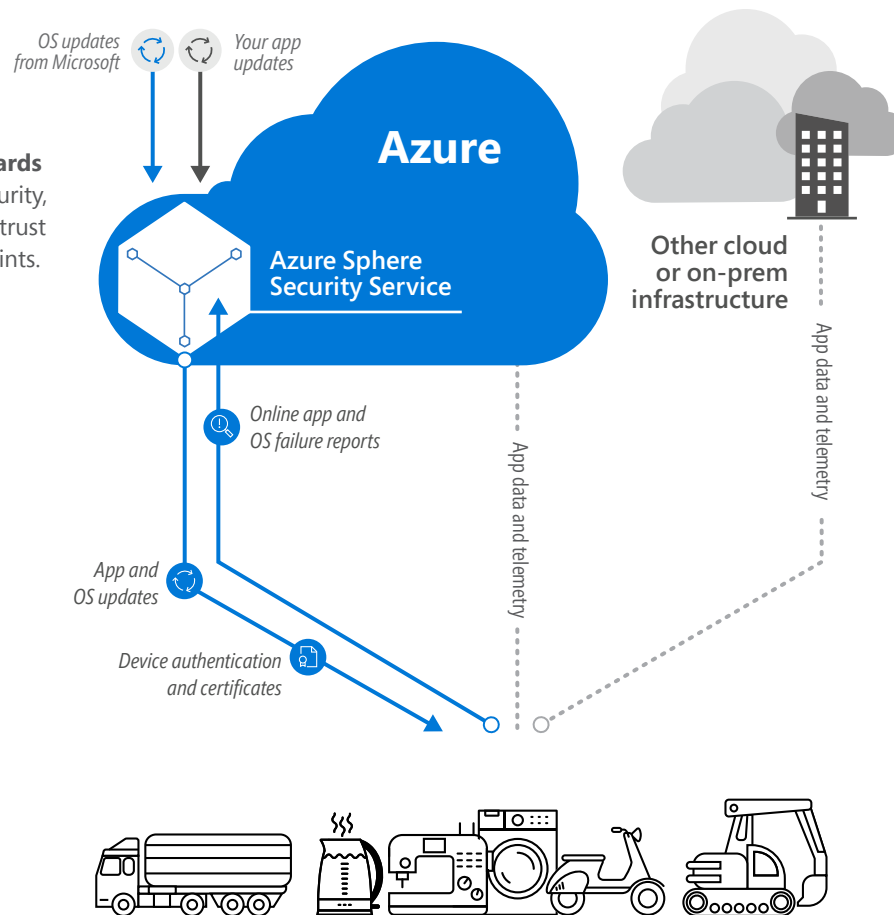

The Azure Sphere Security Service guards every Azure Sphere device. It renews security, identifies emerging threats, and brokers trust between device, cloud, and other endpoints.

Protecting devices with certificate-based authentication

Guaranteeing device authenticity and running only your genuine software

Getting insight into device and application failure and visibility into emerging threats

Deploys app updates to your Azure Sphere powered devices

Azure Sphere gives you choice. You can connect data from any cloud, proprietary or public, or even to your on-prem infrastructure to the Azure Sphere Security Service.

Informing your app with data

Storing telemetry and insights

Providing customer information

Housing commerce and other transactions
