Breakthrough: Women Leading the Way

Why not? Why aren't more women in leadership positions throughout organizations? "The way we've always done it" is dangerous. We must do better.

This course empowers women at all levels to thrive in their chosen profession by equipping them with the necessary skills, strategies, and mindset to navigate challenges and drive positive change. Through a combination of theoretical insights, practical tools, case studies, and interactive discussions, participants will explore the unique dynamics of leadership they face, develop confidence and resilience, and learn to leverage their strengths to achieve professional success. This course aims to inspire and empower women to lead authentically, resiliently, and effectively because.....why not?

Through guided discussions, small-group activities, and self-assessments, participants will learn:

- Why female leadership is important
- Learning to rely on (rather than fight) each other
- Covey ideas, influence others, and assert authority
- Mentoring for every phase of your career
- Choosing your path – what do you want?
- Leveraging strengths and building confidence
- Why do you want to lead?
- Building your personal leadership development plan

8 hours

Who should attend?

This course is designed for females in organizations regardless of rank, expertise, or experience who want to make a difference in themselves, their organizations, and their profession.
