

TODD CARLSON

Vice President, Enterprise Architecture & Application Development

Todd Carlson joined CareSource in 2023 and is currently the Senior Vice President of Enterprise Engineering Solutions. In his role, Todd is delivering the future state of digital healthcare to improve the member, provider, and employee experience. He is accelerating the delivery of robust capabilities by transforming the Application Development

business model, driving innovative solutions, and leveraging digital technologies, architectures, practices, and cloud.

Todd holds a track record of notable accomplishments. He has over 25 years of IT experience in crafting integrated corporate and technology strategies, driving digital transformations, leading key initiatives, and delivering corporate value. As a hands-on collaborative leader, he is proficient in hiring, coaching, and scaling engineering organizations and building superior leadership teams.

Before joining CareSource, Todd held the role of Vice President, Information Technology for Centene delivering the Digital ecosystem of transformational technologies related to Provider, Claims, and other core operations. Prior to Centene, Todd worked at World Wide Technology for 11 years where he provided leadership transformation activities across application development, databases technologies, architecture, analytics and business processes.

A frequent speaker at conferences and a board member for [Alexander Youth Network](#), Todd is passionate about giving back to the community. Todd holds an MBA from Washington University in St. Louis and earned his bachelor's degree in Management Information Systems, with honors, from University of Missouri, St. Louis.

CareSource is a nonprofit, multi-state health plan recognized as a national leader in managed care.
