

## REGARDING THIS BIBLIOGRAPHY

Without undue apologies for circumstances beyond our control, it appears proper to make the following observations:

1. It has been compiled amidst the busy schedule of pastoral and evangelistic efforts. Much of the work has been performed under considerable handicaps which prevented close adherence to the accepted Manual of Style. It is intended as a guide to the sources of material most likely to be available.
2. With one or two exceptions it does not include Commentaries such as Adam Clarke, Pulpit Commentary, etc. These are very numerous and accessible to most of those especially interested in the subject of Tongues-speaking.
3. There has been no indication of which of the books, booklets and articles herein listed are for the Charismatics' position, and which are against it. An honest effort has been made to study both sides of this question, and to do so with a desire for the truth.
4. The most extensive bibliography on this subject, which is also "divided into pro/con sections for the convenience of the readers." and which indicates whether the book is "pro" or "con"; and distinguishes between books, parts of series, articles and periodicals unpublished materials, tracts and reprints, and other sources is The Modern Tongues Movement, by Robert Gromacti, 1973, which is included in the attached bibliography. His bibliography fills twelve printed pages.
