SUPPLEMENTARY INFORMATION:
Title of Collection: Consumer Complaint Survey.
OMB Control Number: 3170–00XX.
Type of Review: New information collection.
Affected Public: Individuals or Households.
Estimated Number of Respondents: 9,200.
Estimated Total Annual Burden Hours: 1,840.
Abstract: The Dodd-Frank Wall Street Reform and Consumer Protection Act charges the CFPB with researching, analyzing, and reporting on topics relating to the CFPB’s mission including consumer behavior, consumer awareness, and developments in markets for consumer financial products and services. To improve its understanding of consumers and institutional actors in financial markets, the CFPB makes use of data collected through the complaint process. The CFPB seeks to enhance the utility of these data by better understanding the broader population of consumers who experience issues with their financial products and services. The CFPB proposes to collect data with two new surveys intended to identify factors that influence a consumer’s decision to use the complaint process. The initial pilot survey will focus on consumers who have experienced issues with their credit cards and will include a sample of people who have used the CFPB’s complaint process, and another sample of people who experienced similar issues but did not file a complaint with the CFPB. This design (known as a case-control study) will allow us to identify key factors that are associated with submitting regulatory complaints.

The pilot survey will inform a second survey which will focus on a broader range of products and services. The second survey will (to the extent feasible) cover additional products about which consumers can submit complaints to the CFPB including (but not limited to) mortgages, vehicle loans, bank accounts, and debts owed to third-party debt collectors. Both surveys will collect data about factors that may play a role in consumer’s decision to submit a complaint. These include information about their use of a given product, the problems they encountered when using a given product, their attitudes and perceptions towards the product and its offeror, as well as demographic information.

Request for Comments: The CFPB published a 60-day Federal Register notice on March 6, 2024 (89 FR 15981) under Docket Number: CFPRB–2024–0007. The CFPB is publishing this notice and soliciting comments on: (a) Whether the collection of information is necessary for the proper performance of the functions of the CFPB, including whether the information will have practical utility; (b) The accuracy of the CFPB’s estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be reviewed by OMB as part of its review of this request. All comments will become a matter of public record.

Needs and Uses: The CMMC Program provides for the assessment of contractor implementation of cybersecurity requirements to enhance confidence in contractor protection of unclassified information within the DoD supply chain. CMMC contractual requirements are implemented under a Title 48 acquisition rule, with associated rulemaking for the CMMC Program requirements (e.g., CMMC Scoring Methodology, certificate issuance, information accessibility) under a Title 32 program rule (32 Code of Federal Regulations (CFR) Part 170). The CMMC Title 32 program rule includes two separate information collection requests (ICR), one for the CMMC Program and this one for CMMC eMASS.

The CMMC instantiation of eMASS is the electronic collection mechanism for collecting CMMC program data, which provides the Department of Defense (DoD) visibility of the CMMC Levels 2 and 3 certification assessment results. This information collection is necessary to support the implementation of the CMMC assessment process for CMMC Level 2 and Level 3 certification assessments, as
