PROVISION ENTERPRISE

Competition drives performance. It also drives your stores apart.

But an enterprise competes together. Thinks together. Works together. It doesn’t let internal rivalries drive stores apart.

In an enterprise, all stores grow together.

### Enterprise Dashboard

**Needs Attention**

Centralize Appraising
Now when anyone in your group appraises a car, they can assess its potential beyond their own store. Provision Enterprise provides Market Days Supply and profit potential for every car you consider, in every live market you manage. If a vehicle being appraised at one store fits another store’s Provisioning strategy, you can easily accept the inventory and assign it elsewhere. Every store gets a better mix, and every appraisal gets more opportunity.

Monitor KPIs
With the Enterprise upgrade, reporting gets more robust, drilling down to store-by-store details. In a single view, see critical KPIs like turn, inventory age and more on an intuitive dashboard. Know where you’re over- and underperforming so you can make adjustments and better position each store for success.

Track Active Appraisals
Provision Enterprise makes it easy for dealer principals to track the progress of appraisals across the group. See HQ pending, HQ reviewed, which vehicles were accepted or rejected, and more. The transparent progress reports allow group leaders to recommend the best store to accept an appraised vehicle, and they make the appraisal process more efficient.

Reallocate Inventory
With a holistic view of inventory across your enterprise, you can identify opportunities to move vehicles from one market to another. If a vehicle underperforming at one store shows stronger Market Days Supply and profit potential at another, you can easily reallocate it. Provision Enterprise even factors in transportation costs to tell you when inventory transfers will translate to a profit advantage for the group.

It’s Time to Grow Together.
