Welcome to one of the city's most established and comfortable neighbourhoods: Bathurst & Lawrence. It provides all the amenities you need to really live your life (without having to rely on a car!)

* For almost fifty years, Menkes has been delivering some of the finest condominium addresses to Toronto, and Crystal Towers is one of them. Now is your opportunity to experience it first-hand.

* The site is comprised of two mid-rise towers sitting on lushly landscaped acreage. The towers are thoughtfully distanced from one another, linked by a central lobby with 24 hour concierge and anchored by a circular Arrival Court, a stunning outdoor pool with sun deck and garden space and a waterside Pavilion.

* You do not find grounds like this in newer developments. Living here is like living in a park!

* Indoor amenities include a whirlpool, an equipped exercise room, men's and women's saunas and change rooms.

* Amenities include a roomy main floor multi-purpose room with a kitchen and a guest suite. There is also a hobby room and an on-site management office.

* The suites are equipped with an intrusion alarm that has a direct feed to the concierge desk.

* There is underground parking, for both resident and visitors, that is monitored with security cameras. The area is spacious and well-lit.

* There is individually controlled heating and air conditioning for your in-suite year-round comfort.

* You are mere steps from Lawrence Plaza, and synagogues, churches, bakeries, shops and services.

* You are almost equidistance to the Yonge-Lawrence subway station and the Lawrence West subway station. Take your pick. The bus is right at the corner.

* Common areas have undergone extensive renovations and some of the common area rooms have been updated as well. One of these owners was instrumental in selecting finishes and colours.

* Almost all closets in this suite have been enhanced with additional custom built-ins. The storage capability in this suite as a result is outstanding!

* Many cabinets have been customized with pull out shelves...another well-thought-out design change that maximizes storage.

* The "Magic Pak" heating-cooling system in the suite was recently newly-installed in November 2016. This allows individual year-round insuite temperature control.

* The front-load washer is the newest appliance: just installed in January of this year.
