Prev Article Next Article These All App works with Window 7 and Window 8 OS. Below we mentioned that works with Windows 8, 8.1 and Windows 10. Backtrack Android Mobile 2015 BackTrack organizes tools in 12 categories: – Information gathering – Vulnerability assessment – Operational tools – Escalation of privileges – Access maintenance – Reverse engineering – RFID tools – Stress testing – Forensics – Reporting tools – Services – Install Miscellaneous and Run Back track Android 2 devices 15 What you will need - Backtrack 5 ARM - Free space on the root of you device backtrack 5 - Rooted device How to root Android Device – Busybox - SuperUser - Terminal Emulator – AndroidVNC-Complete Linux Installer Now download all those apps from Google Play. 1. First you need to download a compressed backtrack hand image android backtrack; The second thing is to install and download ZArchiver extract compressed backtrack image file for Android Mobile ZArchiver Download Z archiver 3. Okay, you're ready to install backtrack android,Now you need to install busybox android app on your Android device, download busybox app from google play store Busybox Download Busybox Download Busybox Android App 4.Now you need to install Linux Installer on your android mobile device, Linux installer is the main application in the process Linux Installer Download. 5. Open linux installer and click the Launch button on your right side Linux installer android linux installer android 6. Click Settings & Edit, then change the file path to your backtrack image, the .img file obtained on your phone. 7. Download Terminal Emulator from Google Play Store. Terminal Emulator will open, you just have to continue the installation steps, ask you for a new password, and some preferences. Once this is done, you will get a root@localhost ~#, like the image below: Terminal Emulator running Backtrack for Android 8. You now backtrack! Now, if you want to backtrack to the GUI, go to Google Play and download the Android VNC app. Type this Terminal Emulator startvnc. 10. To connect with VNC we need to know the port where VNC is listening. Run netstat-anpt and remember the port where the VNC is listening. In this case, the port is 5901 Terminal Emulator running Backtrack for Android 11. Open AndroidVNC and fill out the form as follows: Nickname: BT5 Password: toortoor Address: 127.0.0.1 Port: 5901 Login and you will see Backtrack 5 interface © If you want to Download and install more Linux distribution with the same trick and method . All Android Linux Distribution Download Link Also read: Prev Article Next Article
