Of course he had a whole team of physiotherapies, gym coaches, doctors and running specialists running him, but in the end he still came out with a winning body. Still, the most interesting part of the shoot is the film's schedule in which Farhana is seen practicing running at an altitude of 15,000 feet. Although Farhan falls several times while running and seems breathless more than a dozen times, there is always a smile on his face. I've been playing it for the last hour and after a lot of fighting I was able to bring it all to an end. The story behind the map is simple. You need to get on the base and clean it from the inside. This may seem like a simple task, but since the map is not very simple, things are not always what they seem. Also, it is worth mentioning the fact that the map has its own LIVE boss and custom mobs, unlike most maps. The map also has some parkour parts and some simple puzzles. Pros: The Big Story; Great environment; Amazing use of command blocks; Custom mob; Cons: The story needs some polishing; Parkour's a little bit of a beat; Suggestions: Make a follow-up. My score: Story: 10. Environment: 10. Ingenuity: 10 Complexity: 9th Share By Editor Published November 5, 2014 On this map you will find a mixture of modern buildings and military base. It may be considered a gated community where wealthy people living in luxury homes are protected by working people on a military base. There are a lot of homes and they all look very luxurious with swimming pools and houses the size of villas. On the surrounding outskirts of the city are military buildings such as hangars and pad landing helicopters. There is even a port where you can find a large military ship. Although the mix of creations on this map is a bit strange, the creations are very impressive.
