Setup

1. First remove the Elite Pro 1.3m Audio Cable from the Elite Pro Headset (if connected). When disconnecting this cable, hold onto the thicker plug section; do not pull using the cable itself. Connect the 1.9m Elite Pro Tournament Audio and Chat Cable to the short cable hanging from the Left Earcup of the Elite Pro Headset. Once fully inserted, the orange stripes on the Cable should be visible through the corresponding slots on the connector.

2. Disconnect the Elite Pro Microphone that originally came with the Elite Pro Headset (if connected). Connect the Elite Pro Tournament Noise Cancelling Microphone to the headset.

3. Make sure the Microphone is positioned according to the diagram below.

4. Make sure to re-calibrate your Background Noise Limiter, Mic Boost, and Mic Monitor Levels for your new microphone.

5. If you or your friends hear sudden bursts of distortion double check the Mic is angled towards your mouth, not nose and re-adjust the calibration of the Background Noise Limiter.

How to Calibrate:
The mic mute LED on the TAC will light up blue when the microphone detects noise and it will be white when it doesn’t.

You can use this to properly adjust the “Background Noise Limiter” on the TAC. Increase the noise limiter one notch at a time until the flashing blue stops. Once it does, that means your microphone is no longer picking up background sounds, such as your keyboard, breath, etc.

Do make sure however that you don’t raise it too far and it still lights up blue when you speak.
