Ashley Brady has been promoted to Assistant Dean of Biomedical Career Engagement and Strategic Partnerships. After obtaining her Ph.D. in Pharmacology from Vanderbilt and then completing an international Chateaubriand Fellowship in France and an NRSA postdoctoral fellowship at Vanderbilt, she joined VU Foundation Relations as an Associate Director. From there, she joined the BRET Office as Director of Career Engagement and Strategic Partnerships in 2014. In that role, established career development and professionalism initiatives for Vanderbilt’s biomedical postdoctoral fellows and PhD students, including the “ASPIRE Postdoctoral Café for Career Planning”, a twice monthly professional development discussion series for postdoctoral fellows and the ASPIRE Externship and Internship programs, which provide job shadowing or short-term internship opportunities locally and nationally in a range of career areas. Ashley is currently PI of a Burroughs Wellcome Fund Career Guidance for Trainees Award entitled Data Science Essentials: Transitioning Biomedical Scientists from the Bench to the Cloud. She also plans and teaches a variety of other career development curricula, and interfaces with numerous biomedical training programs to provide career-related resources for participating trainees. Having gained recognition for her work, she is frequently invited to speak at local and national venues and to write articles about creating meaningful experiential learning opportunities for biomedical trainees.
