Ankou in the fourth level of the security stronghold can drop half of the left skull, one of the four parts of the skull scepter. Ankou monsters are popular for common death and blood jogging drops. It can be set as deadly tasks by Vanaca, Neff/Sieve, Cristellia, Doradel and Kunar Kunar Mateen. Sites [Editing Source] Tips [Editing Source] Adif Amulet works on this monster as an undead creature. However, if Ankou is your killer task, the Salvi amulet does not stack with a bonus received by the killer helmet. There is a safe point in the forgotten cemetery, located behind the southwest sarcophagus, on the square between the bones that multiply. Beware of player killers because this is about a wild 30 level. Moreover there is a safe located in the security stronghold: Sepulchre from the death floor. This spot can be found in the southwest room, by standing on the south side of the south-east skeleton. To speed up the task of the ankou killer, multicannon can be used as a dwarf in a wild killer cave. Beware of PKers.
