INSTALLATION INSTRUCTION
Wall Washer LED Track Luminaires
H-LED42W, L-LED42W, J-LED42W, WTK-LED42W, WHK-LED42W

IMPORTANT SAFETY INSTRUCTIONS

• Read all instructions before installing.
• System is intended for installation by a qualified electrician in accordance with the National Electrical Code and local regulations.
• Go to the main fuse box, or circuit breaker. Place the main power switch in the “OFF” position and unscrew the fuse(s) or switch "OFF" the circuit breaker switch(es) that control the power to the fixture or room that you are working on.
• Place the wall switch in the “OFF” position.

CAUTION
All parts must be used as indicated in these instructions. Do not substitute any parts, leave parts out, or use any parts that are worn out or broken. Failure to follow this instruction could invalidate the ETL/CETL listing of this fixture.

OVERVIEW:
Fixtures are designed for use on WAC Lighting's track systems. They may also be used on other manufacturer’s brand of track (consult factory for compatibility).

FIXTURE INSTALLATION FOR J/H/L TRACK:
1. First find out how the track is installed, there are two situation.

![Diagram of first situation](image1)

Figure 1

![Diagram of second situation](image2)

Figure 2

WAC Lighting retains the right to modify the design of our products at any time as part of the company’s continuous improvement program. JULY, 2014
2. According to the type of the installed track, adjust the adapter on both ends of the light. For HT/JT or J2-T tracks, adjust the adapter as is shown in Figure 3. To install LT track (normal), adjust the adapter as is shown in Figure 3. To install LT track (reverse), adjust the adapter as shown in Figure 4.

3. Press the bass of the adapter, inset the adapter into the groove of the track. The product includes 2 adapters (one with conductive strip for input supply and installation, one without conductive strip for track installation).

4. If the track (HT/LT/JT or J2-T) is installed forward like in Figure 1, rotate the adapter with conductive strip 90° counterclockwise to lock it. If the track is installed reverse, rotate the adapter with conductive strip 90° clockwise to lock it, and rotate the adapter without conductive strip 90° to any direction and lock it.

INSTRUCTIONS FOR INSTALLING WT/WHT SERIES:
1. Embed the track connector into the groove of the track, push clip of the track connector should be closed up before the connector is embedded, the handles should be on the outer ends of the light to lock.

2. Rotate the handles and fix the connector to the track. The product includes 2 track connectors (one for input supply and installation, one for track installation).
NOTE:
1. The handle of track connector can be rotated 90° in either direction.
   Attention: The handle of the track connector is designed to be rotated 90° in either direction, but can only rotate
   90° to one direction after the connector is fixed with the track. When the working direction of the light is changed,
   the handle can still be rotated to the same side of the track. But the light emitting surface would be on the other
   side of the connector (Figure 6).
2. WTK-LED42W Fixture use on WAC WT 120V track system only, WHK-LED42W Fixture use on
   WAC WHT 277V track system only (Figure 7).

INSTRUCTIONS FOR INSTALLING HM1-T SERIES PRODUCTS:
1. Unscrew the lock nut from the track adapter.
2. Insert the track into the track adapter upward.
3. Check the direction of the track (Figure 9), both the neutral line sign of the track and the adapter should be on
   the same side to make sure the contact between conductive strip and track is solid.
4. Tighten the lock nut.

5. The fixture can be used with HM1-T Flexrail, minimum bending radius R≥23½”.

REMOVE THE LIGHT:
To remove the light from the track, follow the instruction in reverse order.
Attention! When removing, hold the light to prevent from falling!

USE THE LIGHT:
To adjust the wall wash area of the light, you can rotate the light body from 0° to 45°.
Attention! Light can get very hot, be careful not to burn your hands.
