STONEfaçade®

Architectural Stone
Cladding System

Beauty that's set in stone

Turn your dream into reality

Nothing says “Welcome home” like the warm and inviting look of stone. Now you can take your home’s exterior to a new level with CertainTeed STONEfaçade, a manufactured architectural stone veneer that delivers the beauty and craftsmanship of natural stone in an affordable, durable, and easy-to-install panelized system.

Siding: STONEfaçade in Adirondack Snowfall, Monogram Double 4" Clapboard in Flagstone, and Cedar Impressions® Individual 5" Sawmill Shingles in Driftwood Blend
Trim: Vinyl Carpentry® & Restoration Millwork®
Roof: Landmark® in Colonial Slate

Beautifully simple to install

Smart Investment

EZ

Easy to Install

No Mortar

The panelized design of the STONEfaçade cladding system features a fast and easy installation. This eliminates the need for mortar and speeds up installation, as well as the need to work with multiple contractors on multi-product projects.

Installing stone veneer on the exterior of your home is a smart investment, with **one of the highest returns** of any major home remodeling project when it's time to sell.

Simply beautiful to behold

The design flexibility of STONEfaçade gives you the freedom to create any look you can imagine. It can be used to enhance both the exterior and interior of a home - accenting entryways, creating kneewalls to complement siding, and showcasing mantles, accent walls, and other spaces that the look of stone can stylishly refine.

Curb appeal is an **important consideration** for home buyers when it comes to home exteriors.

An Innovative System Design

Less room for error. Installs in cold weather.

Traditional masonry must be installed in temperatures above 40°F to avoid the risks of mortar and grout failure. With STONEfaçade, there's no mortar involved, so installations can go on when temperatures drop.

No Mortar

only **3** steps

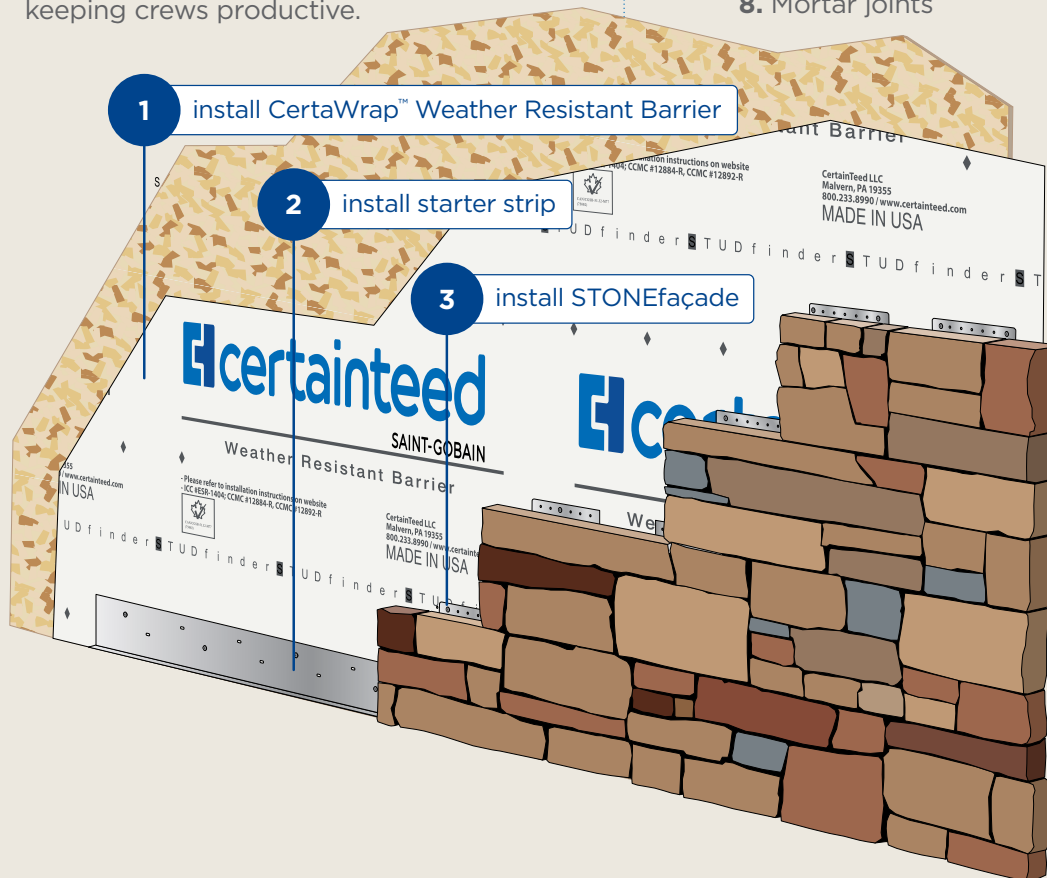

vs

Traditional masonry veneer installation

1. Install weep screen
2. Install a layer of WRB
3. Install another layer of WRB
4. Install lath
5. Apply mortar scratch coat
6. Apply mortar setting bed
7. Adhere masonry
8. Mortar joints

CertainTeed STONEfaçade installs **SIX TIMES** faster than traditional stone, helping your customers get to the next job faster.

Three to four squares of STONEfaçade can be installed in a single day, keeping crews productive.

Moisture management to protect your home

3/8" Rainscreen

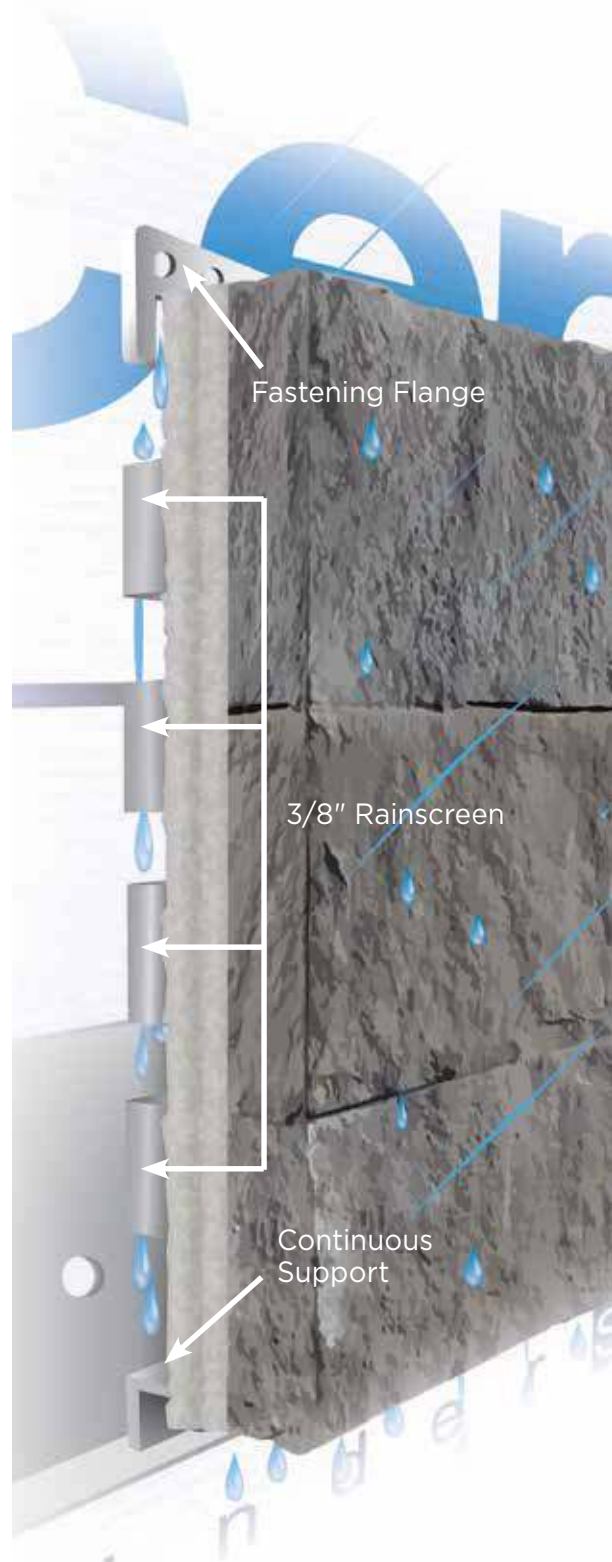

STONEfaçade features the industry's only **fully-integrated rainscreen**, providing additional structural support and ample drainage from top to bottom for outstanding moisture management and protection of your most important investment. Our rainscreen is designed to prevent potential structural damage and mold, a common occurrence when masonry products are installed without a well-defined drainage space.

Avoid moisture issues and unwanted call backs

STONEfaçade is the only product on the market that has a true integrated rainscreen. That's essential because moisture intrusion on the exterior wall is one of the leading reasons for wall assembly failure - and costly call backs. Our integrated rainscreen is designed to allow adequate airflow behind the panel. This promotes drying and helps eliminate potential moisture issues like mold and mildew within the wall cavity.

Engineered for Safety

STONEfaçade is engineered for peace of mind. With a Class A flame spread classification, it offers exceptional resistance to fire, ensuring that flames do not spread easily across its surface. As a non-combustible material, STONEfaçade adds a critical layer of safety to your exterior design—making it a smart and secure choice.

Class A

**Wrap around corner
provides a natural
look and feel!**

Cut time without cutting corners

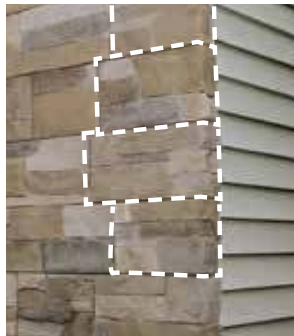

STONEfaçade corner systems are a true differentiator, with pieces that actually wrap around the corner to provide a natural look and feel!

Corner systems are available in all colors in the product offering, and come in left and right corners of three lengths to eliminate the need for cutting lengths. The system's well-thought-out design staggers sizes, so there are no visual seams. STONEfaçade corner systems are also designed to provide a natural-looking return when transitioning to an alternative material.

Corner Installation Options

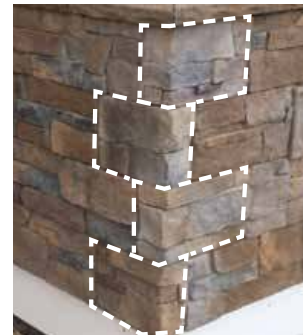

For single wall installation:

Alternate the corner widths, weaving them up the wall to avoid alignment of vertical seams.

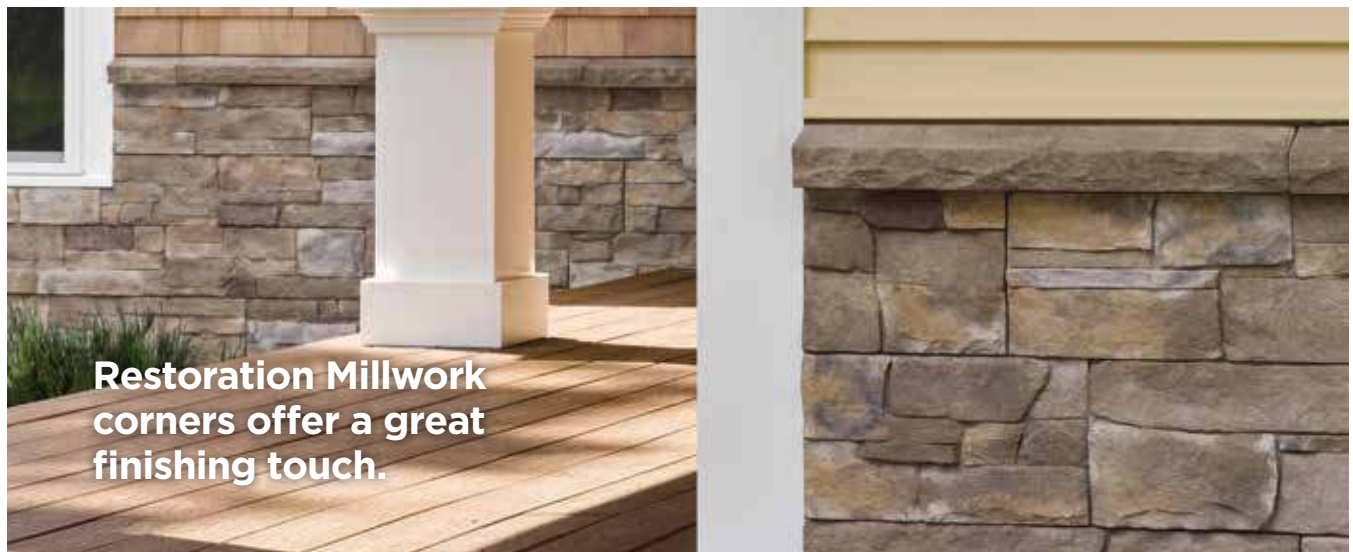

For going around corners where both walls are stone:

Once level, fasten the two screws on the long return of the corner. Alternate both the corner widths and the walls that the long return is applied to, weaving them up the wall to avoid alignment of vertical seams.

Restoration Millwork® Corners

**Restoration Millwork
corners offer a great
finishing touch.**

Stone by Stone. Built to Last.

Proudly Made in
Quakertown, PA

Our architectural stone cladding system is proudly manufactured in Quakertown, Pennsylvania—where quality meets innovation in every panel.
