Dear Colleagues:

After thorough and wide-ranging consideration of the many challenges to safely convene a live meeting this October, the ACG Board of Trustees unanimously decided to offer a virtual educational experience for the 2020 ACG Annual Scientific Meeting & Postgraduate Course. The good news is that we have identified a powerful online platform with the capacity and features to host a meeting as complex as ours while creating many new opportunities for connection, interaction and innovation. There will be a digital e-Poster hall, virtual exhibits, new ways to engage with investigators, dedicated live sessions for Q&A with expert faculty, and smaller fora for conversation, networking and learning. Strengths of the new platform include new ways for investigators to showcase their posters, including recording short presentations and Q&A features to engage on the science. In light of all the challenges for GI clinicians during the COVID-19 pandemic, ACG worked hard to envision a schedule of events that is as easy as possible for you to take time away from essential patient care to log in, connect and really engage with the program.

Your ACG, Your Way

ACG aims to ensure that the days of the Annual Scientific Meeting and Postgraduate Course from Friday, October 23 to Wednesday, October 28 are manageable in terms of competing demands upon your time. The goal is to have this year be “Your ACG, Your Way.” That’s why so much of the rich array of educational content will be available on-demand about two weeks before the meeting and remain there for over 90 days—until January 31, 2021. To bring this on-demand content to life, we have scheduled live sessions with clinical pearls and key take-aways by expert faculty to distill the lessons learned from each session and at the end of each day.

Schedule Changes & Program Enhancements

When you review the schedule for Virtual ACG 2020, look for evening programs during the ACG Postgraduate Course over the weekend of Saturday, October 24 and Sunday, October 25 that will bring our members together at the end of a great day of learning for significant community experiences, such as the ACG Leadership Awards, SCOPY Awards celebration, and GI Jeopardy—ACG’s favorite game show. We implemented a schedule shift to move the Virtual ACG 2020 Annual Scientific Meeting later in the day to create an evening “prime time” for signature ACG offerings such as the President’s Address, a special Emily Couric Memorial Lecture delivered by her sister, Katie Couric, who will also engage in a lively conversation with ACG President Dr. Mark Pochapin, as well as an ACG Town Hall addressing critical issues facing GI and medicine.

Maximizing Our Potential for Interaction

The schedule for Virtual ACG 2020 is designed to maximize the potential for interaction and to enhance the value of the educational experience, while allowing easier participation in the live events and offering sessions aimed at strengthening your pride in ACG and the GI community at this time. The goal is a daily schedule that is both realistic and accessible—especially at a time when patient care demands are pressing and so many clinicians face competing personal and professional obligations. We are getting through this pandemic together, we are reopening our practices, we are getting back to doing endoscopy, and, of course, we are all looking forward to getting together at our Annual Meeting in October—this time in the virtual space. There we will discuss what we are all so passionate about: how to improve care for our patients and our profession.

Please stay safe and well,

Mark B. Pochapin, MD, FACG, ACG President

ON-DEMAND CONTENT

The rich array of educational content for Virtual ACG 2020 is currently available on-demand and will remain available until January 31, 2021. You will have access to on-demand sessions based on the courses for which you register. We encourage attendees to watch the full-length on-demand presentation recordings prior to the live-streaming Q&A sessions. For a complete listing of on-demand content, see pages 18-65.

LIVE-STREAMING INTERACTIVE SESSIONS WITH EXPERT Q&A

To bring this on-demand content to life, from October 23 – 28, we have scheduled live-streaming sessions with clinical pearls and key take-aways by expert faculty to distill the lessons learned from each session. Attendees will have the opportunity to submit typed questions for the faculty during these sessions. You will have access to live-streaming sessions based on the courses for which you register. These live-streaming sessions will be recorded and will be available on-demand within one week of their broadcast date to view at your convenience. Check out the Schedule-at-a-Glance on pages 4-5 for a guide to the daily live-streaming content. For a complete listing of sessions and faculty, see pages 10-17.

OPEN ACCESS LIVE-STREAMING EVENTS

Virtual ACG 2020 offers special events aimed at strengthening your pride in the College and in the GI community at this time. Join your colleagues for significant community experiences such as the ACG Leadership Awards, SCOPY Awards celebration, and GI Jeopardy—ACG’s favorite game show! A schedule shift for 2020 creates evening “prime time” sessions to maximize participation in such signature sessions as the President’s Address, a special Emily Couric Memorial Lecture delivered by her sister, Katie Couric, and a live ACG Town Hall addressing healthy equity.

CREATE A CUSTOM SCHEDULE

Using the virtual platform’s “Sessions” feature, search by course, topic, speaker, keyword, and more to find both live-stream and on-demand sessions. Select All Days for both live-stream and on-demand content, or search a particular day for live-stream only or on-demand for pre-recorded content only. Once you find what you are looking for, click “Add to Schedule” to create your personal schedule for ACG 2020.

DIGITAL EPOSTER HALL

ACG is excited to announce the inclusion of ePosters to this year’s program, where poster authors will share their research and interesting clinical cases electronically. Attendees can easily browse nearly 3,000 high-quality digital posters, listen to recorded audio of presenters explaining their findings, zoom in on poster details, take notes directly on the files, and download the posters in PDF format (when permitted by the presenter). To foster engagement with investigators and discussion of their findings, participants will be able to submit questions directly to poster authors. ACG 2020 attendees will have access to the ePoster Hall both during and after the meeting, allowing the education to continue well beyond the meeting dates! Visit the ePoster Hall at https://eventscribe.com/2020/ACGPosters.

VIRTUAL EXHIBIT HALL

Christopher C. Thompson, MD, MSc, FACG is the Director of Endoscopy at Brigham and Women’s Hospital and an Associate Professor of Medicine at Harvard Medical School. He is also the Advanced Endoscopy Fellowship Program Director and is clinical faculty at Boston Children’s Hospital and the Dana-Farber Cancer Institute. Dr. Thompson’s clinical interests include endoscopic surgery as applied to foregut conditions, pancreatobiliary disease, postsurgical complications, and bariatric endoscopy. He spends the majority of his time performing these advanced endoscopic procedures and also cares for patients in the ambulatory setting and on the gastroenterology inpatient consult service. The remainder of his time is devoted to research activities in endoscopic surgery, with a focus on device development, endoscopic education, and clinical outcomes. He currently has active clinical, translational, bench, and large animal protocols. He has also led several multicenter clinical trials. His research has resulted in numerous patents, the development of new endoscopic procedures, and over 200 publications. Some of his important clinical innovations include the development of new endoscopic techniques for treating pancreatic necrosis, gastric outlet obstruction, sleeve gastrectomy stenosis, pancreatojejunostomy anastomotic strictures, and postsurgical complications. He was responsible for much of the early work in bariatric endoscopy, helping to pioneer the field, and edited the first textbook on the subject. In addition to these clinical innovations, he developed an endoscopic part-task simulator that is used by many fellowship programs. He was a founding member of the original NOTES working group and founding chair for the Association of Bariatric Endoscopy (ABE). These accomplishments have led to a broad clinical referral base, and national and international invitations for lectureships and live case demonstrations. He has mentored more than 20 fellows, many of whom have gone on to thrive in prestigious academic institutions, and he established the first Bariatric Endoscopy Fellowship.

The AJG Lecturer is chosen by the Co-Editors of The American Journal of Gastroenterology with approval from the ACG Educational Affairs Committee and the ACG Board of Trustees.

Foregut Endotherapy: Cutting Edge Technology for 2020 and Beyond
Christopher C. Thompson, MD, MSc, FACG
Monday, October 26 | 4:00 pm – 4:30 pm (ET)

Christopher C. Thompson, MD, MSc, FACG is the Director of Endoscopy at Brigham and Women’s Hospital and an Associate Professor of Medicine at Harvard Medical School. He is also the Advanced Endoscopy Fellowship Program Director and is clinical faculty at Boston Children’s Hospital and the Dana-Farber Cancer Institute. Dr. Thompson’s clinical interests include endoscopic surgery as applied to foregut conditions, pancreatobiliary disease, postsurgical complications, and bariatric endoscopy. He spends the majority of his time performing these advanced endoscopic procedures and also cares for patients in the ambulatory setting and on the gastroenterology inpatient consult service. The remainder of his time is devoted to research activities in endoscopic surgery, with a focus on device development, endoscopic education, and clinical outcomes. He currently has active clinical, translational, bench, and large animal protocols. He has over 200 publications. Some of his important clinical innovations include the development of new endoscopic techniques for treating pancreatic necrosis, gastric outlet obstruction, sleeve gastrectomy stenosis, pancreatojejunostomy anastomotic strictures, and postsurgical complications. He was responsible for much of the early work in bariatric endoscopy, helping to pioneer the field, and edited the first textbook on the subject. In addition to these clinical innovations, he developed an endoscopic part-task simulator that is used by many fellowship programs. He was a founding member of the original NOTES working group and founding chair for the Association of Bariatric Endoscopy (ABE). These accomplishments have led to a broad clinical referral base, and national and international invitations for lectureships and live case demonstrations. He has mentored more than 20 fellows, many of whom have gone on to thrive in prestigious academic institutions, and he established the first Bariatric Endoscopy Fellowship.

The AJG Lecturer is chosen by the Co-Editors of The American Journal of Gastroenterology with approval from the ACG Educational Affairs Committee and the ACG Board of Trustees.

The live-stream sessions for this course will be recorded and will be available on-demand within one week of their broadcast date to view at your convenience (see page 11 for the ASGE Virtual Endoscopy Course live-stream schedule.)

COURSE DESCRIPTION
ASGE’s esteemed faculty will review and highlight a number of emerging diagnostic and therapeutic endoscopic techniques in the literature and their implications in clinical practice. Discussing the most recent published guidelines will be a consistent theme throughout this course. The program is divided into seven topic-focused sessions:

Session 1: Best Practices in Colonoscopy
Session 2: Endoscopy in the Esophagus
Session 3: Bariatric Endoscopy Update
Session 4: Endoscopic Survival in the Covid Era
Session 5: Pancreaticobiliary Adventures
Session 6: Don’t Panic: Evidence-Based Approach to Managing GI Emergencies
Session 7: EUS Enigmas and More

In this era of the COVID-19 pandemic, expert faculty members will provide guidance on preparing for a similar pandemic in the future. Faculty will discuss how to mitigate burnout; a growing problem for gastroenterologists. Key discussions will include updates in best practices in colonoscopy. This session will primarily highlight the most recent recommendations for surveillance after colonoscopy and polypectomy and for endoscopic removal of colorectal lesions. Faculty will also discuss optimal strategies for examination of the colonic polyps and discuss the role of artificial intelligence. The role of advanced resection techniques such as ESD will be highlighted in this session.

This course will provide a state of the art update in Bariatric Endoscopy and provide practical tips for performing endoscopy in patients with altered anatomy. This will be followed by a detailed review of important issues in pancreaticobiliary disorders. Faculty will provide practical guidance on achieving high rates of cannulation during ERCP in clinical practice and optimizing outcomes in ERCP with a focus on reduction in post-ERCP pancreatitis rates. Additional topics will include the latest approach in the management of cholelithiasis, biliary drainage in malignant obstruction and management of pancreatic fluid collections including walled off pancreatic necrosis.

Esophageal topics covered in this course will focus on optimal approach to endoscopic examination of patients with Barrett’s esophagus and endoscopic eradication therapies in patients with Barrett’s-related neoplasia. Presentations will review the latest guidelines in the management of patients with achalasia and provide a practical approach to management of esophageal strictures. This course will include presentations on management of most GI emergencies and will provide a pragmatic and algorithmic approach to managing these emergencies in clinical practice. Faculty will review current guidelines on the evaluation and management of patients with pancreatic cystic lesions and highlight the expanding role of EUS.

Upon completion of this educational activity, physicians will be able to:

• Recognize recent recommendations for follow-up after colonoscopy and polypectomy and endoscopic removal of colorectal lesions. (knowledge)
• Review the latest approaches to bariatric endoscopy and performance of endoscopy in the post-bariatric patient population. (comprehension)

Program Description

With the need to remain abreast of the many new and emerging advancements in the field of gastroenterology and the patient volume increasing as the population ages, the clinical gastroenterologist is more challenged than ever to deliver the best patient care in each situation they encounter. Research across gastroenterology and hepatology areas progresses at a rapid pace. Advances in technology, diagnostic modalities, and therapeutic options have had a positive impact on the management of many GI diseases. Scientific education, based on critical foundational knowledge and clinical skills, the communication of practical methods for treatment, and the ability to integrate the newest tools in diagnosis with the latest therapeutic/treatment options, are key necessities for the GI clinician to deliver top quality patient care. This course will provide updates on a variety of gastroenterology and hepatology subjects including IBD therapy, quality in colorectal cancer screening, functional GI disorders, esophageal disorders, pancreaticobiliary disease, and liver disease. Didactic on-demand lectures, complemented by live-streaming question and answer sessions, will be delivered on the latest topics in gastroenterology and hepatology. Attendees can watch the on-demand presentations prior to the corresponding live-streamed Q&A sessions (see page 12 for the Postgraduate Course live-stream schedule.)

The program is designed primarily for clinicians in GI/hepatology, as well as physician assistants, nurse practitioners, and other advanced practice providers interested in a scientifically sound approach to the management of GI and liver illnesses.

PROGRAM DESCRIPTION

Gain insight from the experts and learn practical take-home points when you attend the ACG Annual Scientific Meeting. Throughout the Scientific Meeting, faculty will present the latest in GI and hepatology, and how to incorporate findings into patient care. Hear about the latest clinical research during the oral presentation plenary sessions. In addition, there will be several featured lectures by world-renowned experts that delve into deeper discussion on a specific topic.

Thirteen scientific symposia and over 65 oral abstract presentations available as full-length, on-demand video recordings will allow attendees to hear lecture presentations from experts. Attendees can watch the on-demand presentations prior to the corresponding live-streamed Q&A sessions (see page 14 for the Annual Meeting live-stream schedule.)

In addition, 15 Bonus Sessions will be offered.

Finally, ACG’s 8th Annual Endoscopy Video Forum will feature the best video presentations submitted from colleagues from across the U.S. and around the world. During this live-streamed session on October 26, attendees can tune in to watch the six selected videos, submit questions for the abstract authors, cast a vote for the best video, and then hear the winner announced live.

The Annual Scientific Meeting program is designed primarily for physicians in gastroenterology and hepatology, as well as physician assistants, nurse practitioners, and other advanced practice healthcare professionals interested in the latest information on state-of-the-art treatment of these illnesses.

CLAIM YOUR CME & MOC IN 4 EASY STEPS

STEP 1: COMPLETE A CME EVALUATION FOR EACH COURSE.*
Visit HTTPS://EVALS.GI.ORG/AM/2020 to complete your CME Evaluation. MOC points will automatically be set to the number of CME credits claimed for the activity. Once you submit your evaluation for CME credits, this total CANNOT BE ADJUSTED.

*ASGE will provide information on how to claim CME and MOC following the completion of the ASGE Virtual Endoscopy Course.

STEP 2: ACCESS THE MOC ASSESSMENT FOR THE COURSE.
After the CME evaluation has been completed, the MOC link on the evaluation page (HTTPS://EVALS.GI.ORG/AM/2020) will be accessible. Access to the MOC assessment is only provided AFTER completing the course evaluation and claiming CME credit. ABP MOC can be claimed by emailing education@gi.org to obtain the required forms for completion. ABP diplomates can NOT use the MOC link on the evaluation site to claim MOC points as outlined in Step 3.

STEP 3: COMPLETE THE ASSESSMENT AND SUBMIT FOR MOC POINTS.
Participants are asked to reflect on and summarize what they have learned, and indicate what they will do differently, stop doing, or keep doing in their practice with more confidence, relative to identified key learning objectives.

★ IMPORTANT NOTE: You will need your 6-digit ABIM ID number and Date of Birth to submit your completion information to ACCME for the purpose of granting ABIM MOC points.

STEP 4: REVIEW FEEDBACK.
After a successful submission, participants are prompted to review the expert feedback on the self-reflection question(s).

2019 Alvin M. Zfass, MD, MACG

OUTSTANDING POSTER PRESENTER
The College is pleased to continue the tradition of presenting awards for “Outstanding Poster Presenter” at this year’s ACG Meeting. ACG hopes to cultivate the ability of clinical GI researchers to use critical storytelling and presentation skills essential for a career as a clinical investigator and scientific communicator.

Within the ePoster Hall, poster presenters have been invited to record a succinct and informative three-minute briefing on their research. Each judge will select one or more presenters from their section who are best able to communicate their key findings, the significance of their data, and articulate the potential impact of their work for clinicians and patients. Recipients of this award will be recognized with a red ribbon added to their ePoster in the online ACG ePoster Hall.

ACG is excited to bring the nearly 3,000 accepted scientific poster abstracts to attendees via an online site this year. All registered attendees of ACG 2020 will have access to the site, and can browse the virtual ePoster Hall to view high-quality digital versions of print posters. The ePoster Hall site opened on October 9, 2020, and will remain available for at least one year following ACG 2020.

**Highlights of the ePoster Hall:**

- In addition to the ePosters, many presenters have recorded audio accompaniments to their presentations.
- The ePoster Hall makes it easy to search by author name, affiliation, poster title, and keywords.
- As you navigate the ePoster hall, use the tools to zoom in on details (or pinch in/out with from a touch screen device).
- Ask a question or send a message directly to ePoster authors who have chosen to share their email addresses.

Presidential Poster Award recipients are identified by a blue ribbon icon, Outstanding Poster Presenter recipients are identified by a red ribbon icon, and posters considered to be Newsworthy are identified by a gold ribbon icon.

---

**Poster Presentations**

All poster abstracts will appear in the supplement to the October 2020 issue of the *AJG*. Their supplement IDs are listed in parentheses before the abstract title.
