LIAT

Use this checklist to be sure you have all of the necessary information to place your order.

□ Catalog Number

Use our build guides to create your catalog number.

□ Laminate Selection

Standard Wilsonart or Formica. Please specify manufacturer, color, finish and model number.

□ PVC Edge Band

See 8 for a complete list of standard LIAT PVC Edge Band options.

□ Metal Color Selection

See 10 for a complete list of standard LIAT Metal Color options.

□ Accessories

Tops

Table tops are constructed of 1-1/8" thick particle board core with a high pressure laminate on top and a backer sheet on the bottom. The edges are externally banded on all exposed sides a 3mm PVC band. Tables over 108" long will be constructed of a two piece top supported by three bases.

Flat Base

The bases are constructed of two 11 gauge vertical aluminum extruded columns bolted together by means of a 1/2" thick particle board bridge. Each column has inset grooves to allow panels to cross the span in a flat plane on either side with a cord drop provided in the middle of the base. Each column has an 8" x 8" leg plate that attaches to the top with (8) #14 x 3/4" self-tapping PPH screws.

V-Shaped Base

The bases are constructed of two 11 gauge vertical aluminum extruded columns bolted together by means of a 1/2" thick particle board bridge. Each column has inset grooves to allow panels to cross the span in a curved plane on either side with a cord drop provided in the middle of the base. Each column has an 8" x 8" leg plate that attaches to the top with (8) #14 x 3/4" self-tapping PPH screws.

Plastic Laminate Panels

The plastic laminate panel option is constructed of two vertical grade pieces of High Pressure Laminate fit between the vertical columns of the base.

Plain Metal Panels

The plain metal panel option is constructed of two plain 14 gauge powder coated steel panels fit between the vertical columns of the base.

Perforated Metal Panels

The perforated metal panel option is constructed of two perforated 14 gauge powder coated steel panels fit between the vertical columns of the base.

Adjustable Leveling Glides

3/8-16 x 3/4" long shank adjustable leveling glides come standard with all bases.

Electrical / Power

The standard built-in power upgrade options include cutouts for a grommet as well as M2X and E2X power units that provide various options for power outlets, data ports and USB charging. Grommets are included in the price of the table, but power units must be ordered separately. See the accessories for standard offerings, or contact project management to customize your desired size.

J-Wire Manager

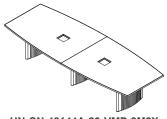

All tables with a power upgrade are to come standard with one J-wire manager made of extruded plastic to hold wires. The J-wire manager is shipped loose and comes with double sided tape to assist with placement in the field. All J-wire managers must be installed with the included screws.
