

COMPANY PROFILE

Advanced Recovery

advancedrecovery.comABOUT

Advanced Recovery Inc. has been built on the assumption that the management of electronic recycling for business is like legal advice, accounting, graphic arts and other bodies of knowledge, in that it is not inherently a do it yourself prospect. Smart business people who are aware of pressing environmental issues facing them and the ominous legal ramifications for violating EPA Law, need to find qualified licensed vendors who will reliably recycle their electronics, ferrous and non-ferrous metals. They need to use these vendors as they use their other professional service suppliers, as trusted allies. We serve our customers as a trusted ally, providing them with the loyalty of a business partner and the economics of an outside vendor. We make certain our customers are provided professional service along with an approved manifest of destruction, transferring ownership of their electronics to Advanced Recovery Inc.
