COMPANY PROFILE

All Kinds of Scrap, Inc

allkindsofscrap.com

ABOUT

Our goal is to make recycling easy and convenient and help you make cash for "ALL KINDS OF SCRAP METALS" . It doesn't matter whether you are a home owner, industrial site, business owner or a construction company we have a solution for you. So never toss out your metal waste in the garbage can again – help us protect our planet. Scrap metal exports are one of the largest in the US and by recycling metals we reduce the amount of ore drilling throughout the world. These metals include copper, steel, aluminum, brass, iron and wires. We also eliminate recyclables entering the landfills. All Kinds of Scrap, Inc. roll-off container service is for "all kinds of" ferrous and non-ferrous recycling, construction metals, factory metals and all related materials. We have available varies container sizes. We will set a small container or if you need we can set up to 40 cubic yard containers. We also provide discounted pricing for multiple container loads. Please call office and request to speak to Bobby Green, Yard Manager. In most cases, All Kinds of Scrap Inc. has the ability to supply next-day service.Pricing for scrapped steel material is determined by type of material, travel distance to and from drop site and the market conditions. A magnet is your best friend when recycling. A magnet can determine what type of metal you have.The difference between ferrous and non-ferrous metal is determined by whether or not the magnet sticks to your metal. â€‹â€‹If the magnet sticks to your metal: You have a ferrous metal in your hands, something common like steel or iron. If the magnet does not stick to your metal: The metal you have is a non-ferrous metal. Many common metals, like copper, aluminum, brass, stainless steel and bronze are categorized as non-ferrous metals. These metals are very valuable to recycle.
