## ABOUT

AllCool Refrigerant Reclaim LLC started in 2004 with a vision to help protect our environment for future generations. We do this by managing used refrigerants and teaching the importance of proper recovery techniques to maximize their potential of being reclaimed. These practices not only help protect the environment but make use of a resource that can be re used many times. We offer cylinder maintenance that includes: complete cylinder refurbishing, straightening of the collar & bottom rim, and valve replacement. Our services also include refrigerant recovery, reclamation, and disposal.
