## A B O U T

Founded in 2000, Amity Metals is a supplier focused brokerage company dealing in recycled metals and plastics. We strive to make scrap marketing a pleasant experience for our clients by finding the best homes for their metal. Our extensive experience in having shipped merchandise to a large number of scrap consumers allows us to expertly advise our clients in the preparation and shipment of their metals. We can arrange for freight and provide flexible payment terms. We can arrange to purchase mixed loads that may require more than one delivery destination thereby maximizing the value of the package. In 2003 we started to handle plastic scrap, primarily industrial grades. We are very cautious and use credit insurance to help protect our assets and those of our clients. Thanks to the business relationships developed over the years the company has been successful. Due to our conservative nature the growth has been slow but solid. Since we are a small company we can provide a very personal touch in all aspects of our business transactions.

**Brokerage and Trading:** Our brokerage services include evaluating scrap and assessing the material with the intention of finding the best market for the goods in terms of quality, freight, packaging and consumer specifications. We purchase the loads from the dealers either delivered to the mills or ports or arrange the freight to have the merchandise picked up at the shipper's location. Our payment terms are flexible and are determined at the time that we present a quote.

**Consulting:** We also offer consulting services. We can travel to your facility, evaluate your operation in terms of handling and shipping your scrap intake and furnish you with a detailed report describing the best alternatives for your individual situation. Please contact us regarding any questions you may have concerning scrap and reusable metals. Our many years of experience with dozens of different consumers both domestic and overseas allows us to quote you, without any obligation, on what we believe to be the best market for your individual package of materials. Some of the items we deal in include: Stainless Steel and Special Alloys: 304, 316, 310, 330, 410, 430 Inconel, Incoloy, Ni- Resist, Cupro

Nickel, Monel, Hastalloy, Nickel, AL6XN, Cobalt alloys, FSX 414, Haynes Stellites, Nitronic, Nimonic, Pyromet, Carpenter Alloys.
