

COMPANY PROFILE

ATEC Recycling

atecllc.com

A B O U T

ATEC Recycling, Inc. owns and occupies a 40,000 sq. ft. headquarters and processing facility that houses our management team, IT asset management, processing operations and material storage. This location is in close proximity to the heartland's interstate system's intersection of I35 and I80 and other major thoroughfares. This facility receives incoming equipment, and prepare the materials for further processing at our facility. Our facility is permitted with the IA-DNR as a Computer Monitor and Television (CRT Glass) handler and recycler and we are an "End of Life" Computer and Electronics Recycler. We have been servicing the computer and electronics recycling needs of businesses, healthcare institutions, municipalities, residents, and educational institutions throughout Iowa and the all of the Midwest since 2010. Our consistent and continual growth over the past four years is a direct representation of our ability to retain current customers and continue to develop new business relationships that last far beyond new customer's short term electronics recycling requirements. ATEC Recycling, Inc. specializes in end-of-life electronics recycling, the process by which obsolete electronic devices are dismantled and separated into clean, reusable commodities. ATEC Recycling, Inc is able to efficiently and effectively process large volumes of end-of-life electronics (also known as e-waste). Our electronics recycling facility is designed to maximize materials recovery and eliminate harmful waste to land fill. ATEC Recycling, Inc. provides downstream electronics recycling services to a variety of markets, including electronics recyclers and collectors, manufacturers, large businesses, Federal-State-County-Local Government and the private sector. "End of Life Electronics" can be old, obsolete, or damaged. In many cases, this material retains little to no resale value. ATEC Recycling, Inc. safely disassembles these products for commodities. ATEC Recycling, Inc. processes ensure that your end-of-life electronics are refined into reusable commodities instead of being dumped in a landfill. E-Waste Collection In addition to serving as a downstream recycler for e-waste, ATEC Recycling, Inc. provides support to e-waste collectors and handlers.

In efforts to support you the customer, we provide a point of contact for your company or organization for seamless logistics of pick up and delivery of e-waste. In addition we provide validated logs specific to the collection of e-waste along with certification need for State recycling programs. The documentation includes annual weights and materials received by your company or organization. ATEC Recycling, Inc, not only provides thorough training for our staff, we also provide community training and support for e-waste collection to ensure that you are in compliance with universal waste handling laws.
