A B O U T

Founded in 1963 by Richard Campbell, Bellman-Melcor LLC was created with one simple goal: provide high quality products and deliver them at a lower overall cost than any other supplier of brazing and soldering alloys. Ours is a classic story of one man's dream to create something from nothing; to share his dream with as many people as possible; to provide each employee with the opportunity to succeed; to treat everyone with compassion, honesty and integrity. Almost 50 years later, our mission is the same. We are 35 people strong. We remain a family owned business that produces over 600 million fabricated parts per year, selling to over 300 companies in 18 countries. We begin every day with the belief that we can make a difference. We make every effort to treat our customers in the same manner that we want to be treated. You will receive prompt, courteous attention to your needs. You will receive reliable technical support. You will receive your order free of defects and on time. This is our commitment to every customer we manage. We take great pride in being the first company in our industry to achieve ISO/TS 16949 Registration. Our commitment extends beyond quality. We promise to deliver the best customer and technical support in the industry. Our vast selection of brazing and soldering alloys makes Bellman-Melcor your preferred source in handling all of your metal joining needs. From the moment we receive your order, our fully integrated quality program insures that you receive the highest caliber brazing and soldering products, delivered on-time and at industry competitive prices. Our staff of experienced professionals rely on real-time Statistical Process Control (SPC) and other leading edge quality assurance technology to keep production on track and within specifications. Since 1963, we have worked closely with the engineering staff of some of the world largest companies to design and fabricate custom shapes for use in a wide range of applications. To better serve our customers in consideration of technical advances in the HVACR industry, we recently developed ChannelFlux, a patented, flux-integrated family of alloys for aluminum brazing. Non-corrosive flux is placed in protective channel

designed to come into direct contact with base metals and flow freely without hidden voids or obstructions. Manufacturer and supplier of brazing alloys and solder in preforms and resale options. Materials include silver brazing alloys, copper brazing alloys, copper phosphorous brazing alloys, aluminum brazing alloys, and flux-integrated brazing alloys. Preform options include brazing rings, brazing washers, brazing discs, edgewounds & bands. Resale options include brazing wire, brazing rod, brazing strip, and brazing paste. Brazing fluxes, plymetal/clad brazing alloys & soft solders are also available.
