A B O U T

Bermco Aluminum has been committed to quality since 1921 when Robert Berman began buying discarded metal products and reselling them to the steel industry in Birmingham. Our reputation for consistently high-quality products, fast service, and competitive prices has made Bermco an industry leader of secondary aluminum smelters. Bermco Aluminum is committed to keeping our equipment state-of-the-art, insuring the highest possible quality of finished goods for our customers. They depend on us to guarantee that their orders will be to exact specifications every time. Bermco continuously modernizes equipment and systems to improve the consistency and quality of the product. We use the latest technological advances in material handling, Statistical Process Control (SPC), and computer controlled spectrometry. We constantly monitor the molten metal chemistry and document the specification of the finished product. From a small, family owned scrap yard located in Birmingham, Alabama during the 1920's to an international supplier of specification secondary aluminum alloy, Bermco Aluminum has evolved to become one of the most dynamic, innovative leaders in the secondary aluminum smelting industry. Quality is never an accident – It is the result of deliberate action. With strong commitment from top level management to shop personnel, this statement is the very essence of Bermco Aluminum. Utilizing state of the art, computer-controlled laboratory analysis equipment and proven statistical process control methods, Bermco Aluminum consistently produces secondary aluminum of the highest quality. To further demonstrate this commitment to quality, Bermco Aluminum has been ISO 9001:2008 Certified. Bermco Aluminum is dedicated to increasing customer satisfaction through continual improvement of the quality management system and providing quality secondary specification aluminum alloys that comply with customer requirements, applicable codes, legal requirements, and industry standard in a safe and efficient work environment.
