## ABOUT

BKT21 is a company that specializes in the development and production of fouling preventive membrane filtration systems. Their flagship product, FMX, is designed to effectively and efficiently recover nutrients such as nitrogen and phosphorus from digestate. FMX is capable of delivering high concentration and high recovery even in challenging conditions, making it suitable for treating high strength wastewater and manufacturing processes with high viscosity, high density, and high solid applications. Stay updated with BKT21 by signing up with your email address.
