**ABOUT**

New River Recycling is the leading metal recycler in the New River Valley. With two locations, we provide recycling services ranging from aluminum, copper, brass and stainless, to steel items such as cars and bulk metal. New River Recycling maintains the area's most competitive prices and the convenience of drive on scales for faster service. We offer commercial and industrial recycling with roll-off container service available. NRR strives to satisfy each customer's needs and hopes to make your metal recycling experience a positive one. New River Recycling is a full service scrap metal recycling center serving the New River Valley since 2001. Our Radford location services all types of steel and is easily accessible with state certified drive-on scales, concrete surfaces, and the area's most competitive pricing. New River Recycling is a full service scrap metal recycling company. Since our beginning in 2001, we have grown to include two locations to become the new river valley's largest metal recycler. As a small company, New River Recycling began with two employees and a modest work space. In the years since, we have added many more employees and several divisions including New River Container, a roll-off container service and Resource Management Group, a licensed materials recovery facility. Our goal is to provide the best customer service, fair pricing and to maintain long term customer relationships. New River Recycling provides electronic recycling services at our Radford Rd. (Christiansburg) location. We purchase electronic components including pc towers, pc boards and cell phone tower parts. New River Recycling can provide scrap metal pick up for commercial and industrial customers. Services include roll-off containers for large debris or indoor rolling carts for small plant scrap metal. Flatbed truck pick up also available.
